SECTION III – RISK FACTORS

An investment in Equity Shares involves a high degree of financial risk. Investors should carefully consider all information in this Prospectus, including the risks described below, before making an investment in our Equity Shares. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could suffer, the price of the Equity Shares could decline, and you may lose all or part of your investment. In making an investment decision, prospective investors must rely on their own examination of us and the terms of the Issue including the merits and risks involved. Investors should consult their tax, financial and legal advisors about particular consequences to them of an investment in the Issue. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, such financial impact cannot be disclosed in such risk factors. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this section. Any of the following risks, as well as the other risks and uncertainties discussed in this Prospectus, could have a material adverse effect on our business and could cause the trading price of our Equity Shares to decline and you may lose all or part of your investment.

This Prospectus also contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus. See chapter titled “Forward Looking Statements” beginning on page 23 of this Prospectus.

To obtain a better understanding of our business, you should read this chapter in conjunction with other chapters of this Prospectus, including the chapters titled “Our Business”, “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, “Industry Overview” and “Restated Financial Statements” on page 154, 264, 138 and 221 respectively of this Prospectus, together with all other Restated Financial Statements contained in this Prospectus. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus.

Unless otherwise stated, the financial data in this chapter is derived from our Restated Financial Statements for the period ended September 30, 2024 and for the financial years ended March 31, 2024, 2023, and 2022, respectively as included in “Restated Financial Statements” beginning on page 221 of this Prospectus.

MATERIALITY

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- Some events may have material impact quantitatively;
- Some events may have material impact qualitatively instead of quantitatively.
- Some events may not be material individually but may be found material collectively.
- Some events may not be material at present but may be having material impact in future.

INTERNAL RISKS

1. *We have certain outstanding litigation against us, an adverse outcome of which may adversely affect our business, reputation and results of operations.*

A summary of outstanding matters set out below includes details of civil and criminal proceedings, tax proceedings, statutory and regulatory actions and other material pending litigation involving us, our Subsidiary, Directors, Key Management Personnel, Senior Management Personnel, Promoter and Group Company, as at the date of this Prospectus.

Cases against our Company:

Nature of Cases	No of Outstanding Cases	Amount involved (In Lakhs)
Criminal Complaints	1#	Unascertained
Statutory/ Regulatory Authorities	--	--
Taxation Matters	6	69.97
Other Litigation	1	unascertained

#The liabilities in the matters are unascertained. In one of the matter involving Gujarat gas Limited, the case is not directly against the company. But it has been made party for the reason of its being one of the contract labour supplier for Gujarat Gas Limited.

Cases against our Director / Key Management Personnel / Senior Management Personnel and / or Promoters:

Nature of Cases	No of Outstanding Cases	Amount involved (In Lakhs)
Criminal Complaints	--	--
Statutory/ Regulatory Authorities	--	--
Taxation Matters	29	146.91
Other Litigation#	--	--

#Our promoters cum directors have been made party to the case against the Company. But the same has not been mentioned in the directors/ promoters column to avoid repetition.

The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and severally. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

Also, there is a litigation in respect of which we have not been able to obtain the case papers viz. petition and other documents and hence details of claim amount / liability involved is not known to us. Accordingly, we are not able to quantify the repercussions of those litigations, if decided against us. Our Company had been made a party to a case bearing no. 20234/2018 filed under the provisions of the Constitution of India and pending before the Hon'ble High Court of Gujarat. The matter has originally been filed against the Government of Gujarat & Gujarat Gas Limited wherein our Company being one of the supplier of contract labour, has been made a party. However, as the matter has not been directly filed against the Company, we have not received any documents with respect to the case matter and hence not in a position to quantify the exact monetary liability / adversities that may be faced by the Company in the matter. However if the case is decided in a manner so as to have an impact the manner and terms of appointment

of contract labour by our clients, the Company may have to incur extra efforts to meet such directions and regulations that may be framed by the authorities in light of the facts of the case, our business shall be accordingly affected thus attracting extra cost to meet such requirements and affecting the profits of the Company.

For further details of certain material legal proceedings involving our Company, our Promoters, our directors, see “*Outstanding Litigations and Material Developments*” beginning on page 274 of this Prospectus.

2. *If we fail to qualify for, or win new work orders from our clients, our business, financial condition, results of operations, prospects and cash flows could be adversely affected.*

We enter into contracts primarily through a competitive bidding process, and our business depends on our ability to bid for and be awarded contracts for projects by clients. Typically, clients advertise potential projects in newspapers or on their websites by publishing pre-qualification notices or through mails if the tenders are limited and of priority. If a project is of interest to us, we evaluate our credentials considering the eligibility criteria specified for the project. We endeavour to qualify on our own for projects that are of interest. Once we pre-qualify for a bid, tender documents are sent to pre-qualified bidders (including our Company) by the client. We then submit a financial bid, along with any technical bid details required including supporting documents such as previous work execution, completion certificates to the client. For further details on the project procurement process, see “Our Business – Project Procurement Flow Chart” on page 154 of this Prospectus. We cannot assure you that we will be able to meet the pre-qualification criteria prescribed by such clients. Finally, even if we pre-qualify for a project, we cannot assure you that our bid, when submitted, will be awarded. Further, certain clients from the private sector may only invite a select group of contractors to participate in the bidding process via RFQ (Request for Quotations). In such instances, we cannot assure you that we will be invited to bid for such projects or that our bid in a non-competitive bidding process will be successful. We spend considerable time and resources in the preparation and submission of bids, and if we are unsuccessful, we will not be able to recover the time and costs incurred by us. In addition, tender processes are regularly subject to changes in eligibility criteria, unexpected delays and other uncertainties, depending upon the nature of the project and its location or target given by the client.

3. *We are highly dependent on certain key customers for a substantial portion of our revenues. Loss of relationship with any of these customers may have a material adverse effect on our profitability and results of operations.*

We depend on certain customers who have contributed to a substantial portion of our total revenues. The following is the breakup of the top customers of our Company for the period ended September 30, 2024 and for the financial years ended March 31, 2024, 2023, and 2022, respectively:

(₹ in lakhs)

Particulars	For the Period ended September 30, 2024		FY 2023-24		FY 2022-23		FY 2021-22	
	Revenue from Operations	%	Revenue from Operations	%	Revenue from Operations	%	Revenue from Operations	%
Top Customer 1	549.05	24.26%	1,070.05	36.40%	1,263.96	43.25%	928.28	46.76%

Top Customers 10	2,063.55	91.17%	2,895.91	98.52%	2,643.70	90.47%	1,985.06	99.99%

There is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. Reliance on a limited number of customers for our business may generally involve several risks. These risks may include, but are not limited to, reduction, delay or cancellation of orders from our significant customers; failure to renegotiate favourable terms with our key customers; the loss of these customers; all of which would have a material adverse effect on the business, financial condition, results of operations and future prospects of our Company. In order to retain some of our existing customers we may also be required to offer terms to such customers which we may place restraints on our resources.

Maintaining strong relationships with our key customers is, therefore, essential to our business strategy and to the growth of our business. Some of our customers may place demands on our resources or may require us to undertake additional obligations which have the effect of increasing our operating costs and therefore affect our profitability. Additionally, the loss of any key customer, may significantly affect our revenues, and we may have difficulty securing comparable levels of business from other customers to offset any loss of revenue from the loss of any of our key customers including our largest customer or even our top five customers.

4. Our revenues from projects are difficult to predict and are subject to seasonal variations.

Our business operations may be adversely affected by severe weather, which may require us to evacuate personnel or curtail services, may result in damage to a portion of our equipments or facilities resulting in the suspension of operations, and may prevent us from delivering services to our project sites in accordance with contract schedules or generally reduce our productivity. Our operations may also be adversely affected by difficult working conditions during the monsoon season and extremely high temperatures during summer months, each of which may restrict our ability to carry on construction activities and fully utilize our resources. These factors may make it difficult for us to prepare accurate internal financial forecasts. In addition, business of our company is seasonal mainly in monsoon season, efficiency of construction work reduces during monsoon season. As a result, our revenues and profits may vary significantly during different financial periods, and certain periods are not indicative of our financial position for the year.

5. Our Company had negative cash flows in the past years, details of which are given below. Sustained negative cash flow could impact our growth and business.

If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

*The figures are negative due to work in progress reversal of last years.

Such geographical concentration of our business in our top regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in such regions to expand our operations in other parts of India, should we decide to further expand our operations. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local dealers, relevant

government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside such markets may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we may face and should not rely on our results of operations for any prior periods as an indication of our future performance.

The industry in which we operate is characterized by changing laws and demands for features, work experience, completion record and timely project execution. These conditions may also result in significant competition. If the end-user demand is low for our customers' services, there may be significant changes in the orders from our customers and we may experience greater pricing pressures. Our success is therefore dependent on the success achieved by our services and the same being continued to be well acceptable in market. If our services fail to gain acceptance, we may experience reduced demand which may affect our sales to such customers, operating margins and all of these combined may adversely affect on our revenue, reputation, financial conditions, results of operations and cash flows.

12. Our failure to perform in accordance with the standards prescribed in the work orders of our clients could result in loss of business or revenue from clients.

Our revenue is generated vide receipt of work orders from our clients. The majority of these work orders may require us to comply with the code of conduct, rules and regulations prescribed by our clients, which may increase our compliance burden and cost. We may be unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls. Further any disruptions to our businesses as a result of actions outside of our control, could significantly impact the continued performance of our obligations to meet the quality or performance standards set out in our work orders which may in-turn harm and

cause clients to terminate their contracts with us, impair our ability to obtain renewal of our orders from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In the event that we are unable to meet the prescribed obligations, we may also be required to pay penalties to our clients on the terms set out in our work orders. For instance, the fittings that we procure is from the list of approved vendors from our clients though there are chances we might receive defective fittings with sub-standard performances which cause additional time and costs in the project. In any such instance we have to compensate the client or the amount is deducted as a penalty from our running account bills. Certain work orders may also require us to provide indemnities to our clients with respect to any negligent act or omission by or misconduct of our employees. In the event there is an increase in claims against us for which we are not insured, our business, financial condition and results of operations may be affected.

13. *Our operations may be adversely affected in case of accidents at any of our operations sites.*

Fitting of pipelines, checking leakage of gas pipelines and other associated works by labour during our operations or otherwise, lifting of materials by humans, construction activities, etc. may result in accidents, which could cause injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. There have been minor instances of injuries during Company's operations, which were managed on-site or treated at nearby hospitals. Further, we hereby confirm that no such major incidents have occurred in the past that would materially impact the operations of the Company.

14. *We have issued Equity Shares during the last one year which may be at lower than the Issue Price.*

Our Company had issued Bonus shares of 53,13,452 equity shares on September 25, 2024 in the ratio of 17:1 i.e., 17 Bonus Equity shares for every 1 Equity Shares held, in the last 12 months which may be at lower than the Issue Price. The Equity Shares allotted to shareholders pursuant to this Issue may be priced significantly higher due to various reasons including better performance by the Company, better economic conditions, and passage of time. For further details, see "*Capital Structure*" on page 94 of this *Prospectus*. The prices at which Equity Shares have been issued by us in last one year should not be taken to be indicative of the Issue Price and the trading price of our Equity Shares after listing.

15. *We generate our major revenue of business from sales to public sector undertakings which may impact our Business.*

The major portion of our revenue for the period ended September 30, 2024 and for the financial years ended on March 31, 2024, March 31, 2023 and March 31, 2022, respectively is from public sector undertakings i.e., 46.74%, 73.71%, 66.28% and 71.74%. Such concentration of our business heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand, our operations may differ from those in which we are currently offering. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local distributors, dealers, relevant government authorities, and are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand more into areas may adversely affect our business prospects, financial conditions and results of operations.

These loans may not be repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lenders at any time. In such cases, we may be required to repay the entirety of the unsecured loans. We may not be able to generate sufficient funds at short notice to be able to repay such loans and may resort to refinancing such loans at a higher rate of interest and on terms not favourable to it. Failure to repay unsecured loans in a timely manner may have a material adverse effect on our business, results of operation financial condition and cash flow.

17. Some of our contracts are the subject of legal and arbitration proceedings. An adverse outcome from any such legal proceedings could adversely affect our business, financial condition and results of operation.

Our Company is into the business of execution of work at the site of its clients which includes engagement of labour on contractual basis on its own part or on the part of its client and with changing labour scenario it may run into labour litigations.

Our Company is into gas distribution projects wherein it is required to deploy long term labour on the site of its client / at its own site. The labour so provided is generally engaged on contractual basis, by the client thus depriving them of regular benefits available to a permanent / regular basis. Since the scenarios are changing and at several places, the labour so deployed has been continuing for years, our clients have run into litigations with the labour union demanding engagement and upliftment of the labours so deployed to be engaged as permanent labour of the client. Although the litigations so lodged are not directly against our Company, our company being one of the contract labour supplier, has been made party to such cases. Further with the improving labour laws and increasing awareness amongst the labour we have been at times penalized for non-compliance of labour laws. Although we take due care to comply all labour laws, and although the penalties so levied are miniscule, we are not sure that we may not match the expectations of the authorities and our manpower at times, in which event we may be engaged into unnecessary litigations with the authorities / trade unions in which event our concentration from the trade shall shift thus adversely affecting the business and financial position of the Company.

For further details of certain material legal proceedings involving our Company, our Promoters, our directors, see “*Outstanding Litigations and Material Developments*” beginning on page 274 of this Prospectus.

20. *There may be possible conflicts of interest between us and our Promoters or our Group Company, or with entities in which our Promoters & directors are interested.*

Our Promoter, Mr. Pankaj Pruthi Desai, is actively involved in the management of both our business and the business operations of our Promoter Group Companies. Any diversion of attention by our Promoter to our Promoter Group Companies may distract or dilute management attention from our business, which could adversely affect our business, financial condition and results of operations. Further, we do not enjoy contractual protection by way of a non-compete or other agreement or arrangement with such Promoter Group Companies. We cannot assure you that such body corporates will not compete with us in similar markets or our existing business or any future business that we may undertake or that we will be able to suitably resolve such a conflict without an adverse effect on our business. Such eventualities may lead to conflict of interest between our Company and our Promoter Group Companies which have been promoted and / or controlled by our Promoters. For more details regarding our Promoters and Group Companies, please refer chapters titled "Our Promoters and Promoter Group" and "Group Companies" beginning on page 212 and 218 respectively of this Prospectus respectively. Any such present and future conflicts may have an adverse effect on our reputation, business and results of operations.

21. *Our individual Promoters play a key role in our functioning, and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our Promoters and Executive Directors remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.*

We benefit from our relationship with our individual Promoters and our success depends upon the continuing services of our Promoters and executive directors who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters and executive directors have been actively involved in the day-to-day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters and executive Directors. If our Promoters and executive directors are unable or unwilling to continue in their present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel or senior management personnel, we may be unable to locate suitable or qualified replacements and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

22. *In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Further we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name and conversion of company to public Company.

While we have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities, there can be no assurance that the relevant authority will issue or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “Government and Other Approvals” on page 274 of this Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

23. *The work order entered into by us are usually standard in nature and may contain terms that favour our clients, which may enable them to terminate our orders prematurely under various circumstances beyond our control and as such, we have limited ability to negotiate terms and may have to accept unusual or onerous provisions.*

The work orders entered into by us are usually in the form and manner as approved by our clients. As a result, we have a limited scope to negotiate the terms of such work contracts, some of which terms may be more favourable to our clients. Usually, work orders include a termination clause which among other terms includes that in any case of performance deviation and three consecutive show cause notices, the client can prematurely terminate the contract.

Our agreements with clients can be terminated prematurely by clients for several reasons, including:

- failure to comply with operational or maintenance standards prescribed under our work orders;
- failure to complete a project within the prescribed timelines;
- occurrence of a material adverse effect, as defined under our work orders;
- occurrence of a force majeure event, such as an act of god, act of war or expropriation;
- performance deviation and three consecutive show cause notices;
- failure to comply with any other material term of the relevant agreement;
- failure to perform work in accordance with the terms of the order or stoppage of work, resulting in a breach; or for convenience, with prior written notice.

Generally certain time extensions are given by some clients as per site criticality and actual check of ground level or due to geographical conditions. Also in the year 2023, the Company received a debarment notice for its Operation & Maintenance Services for Gujarat Gas Limited and as an effect we could not further participate in tenders of such client. Further, the Company in its response via mails requested the client to review its decision and after due assessment, Gujarat Gas Limited issued a notice to the Company on December 13, 2023 reducing the debarment

period only for a period of 1 year (post effective from April 10, 2023). If any of such events occur in future, it will adversely affect our business, financial condition, cash flows and results of operations.

24. *We face competition in our business from other oil and gas infrastructure companies.*

We operate in a competitive environment. Our competition varies depending on the size, nature and complexity of the project and on the geographical region in which the project is to be executed. We compete against major as well as smaller regional oil and gas infrastructure companies. While service quality, performance, health and safety records and personnel, as well as reputation and experience, are important considerations in client decisions, price is a major factor in most tender awards.

We are currently qualified to bid for projects up to a certain value and therefore, are unable to compete with large pipeline infrastructure corporations for high value tenders or contracts. Some of our competitors are larger than us and have greater financial resources. They may also benefit from greater economies of scale and operating efficiencies. Competitors may, whether through consolidation or growth, present more credible integrated and/or lower cost solutions than we do, causing us to win fewer tenders. If we do not succeed in being awarded the contracts for projects, we could fail to increase, or maintain, our volume of order intake and operating revenues. There can be no assurance that we can continue to effectively compete with our competitors in the future and failure to compete effectively may have an adverse effect on our business, financial condition and results of operations.

25. *We require certain licenses, registrations, approvals and permits to operate our business, failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions*

We require certain statutory and regulatory permits, licenses and approvals to operate our business. For details of our licenses/registration/approvals kindly refer the chapter titled “*Government and Other Approvals*” beginning on page no. 274 of this Prospectus. While we believe that we have obtained the necessary approvals which are adequate to run our business, we cannot assure that there is no other statutory/regulatory requirement which we are required to comply with or cannot assure that all the requirements have been met. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew these permits, licenses, and approvals, but there is no assurance that authorities will issue them in a timely manner or at all. Failure to renew, maintain, or obtain required permits or approvals on time may lead to operational interruptions and could materially impact our business, financial condition, and results of operations.

Also, approvals required by our Company are contingent and subject to numerous conditions, and there can be no assurance that they would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions, or due to regulatory actions. If there is any failure by us to comply with applicable regulations or amendments to regulatory frameworks governing our business could result in increased costs, penalties, revocation of approvals and permits, or suffer a disruption in our operational, any of which could adversely impact our business. Our Company is currently in the process of applying for a change in name for all permits, licenses. Details regarding pending approvals can be found in the section titled “*Government and Other Approvals*” starting on page 274 of the Prospectus. However, there is no assurance that relevant authorities will issue these approvals or licenses in a timely manner, or at all.

26. *In addition to normal remuneration, other benefits and reimbursement of expenses some of our directors (including our Promoters) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.*

Some of our directors (including our Promoters) are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. We cannot assure you that our directors would always exercise their rights as shareholders to the benefit and best interest of our Company. For further information, see the chapters titled “*Our Management*” and “*Our Promoters and Promoter Group*” beginning on page 197 and 212 respectively of this Prospectus and the section titled “*Financial Information*” beginning on page 221 of this Prospectus.

27. *Our current Order Book does not guarantee full realization of future income. Some orders may be subject to modifications, cancellations, delays, holds, or partial payments by customers, which could have adverse effects on our operational results.*

Our Order Book represents the value of secured contracts ongoing or yet to be executed as of a specific date, providing insight into our future expected revenues. As per the management estimations and Statutory Auditors certificate dated February 17, 2025, our Order Book as on December 31, 2024 consists of 78 ongoing projects and 7 upcoming projects aggregating to ₹ 24,367.58 Lakhs i.e., combined value of ongoing/upcoming projects awarded. For further details on our ongoing and upcoming projects, please see chapter titled “*Our Business*” beginning on page 154 of this Prospectus. However, it is crucial to note that the calculation and presentation of the Order Book may vary from other companies, including our competitors. Successful execution of the Order Book depends on adhering to contractual obligations, including delivery schedules and quality requirements. Failure to meet these terms, whether actual or perceived, may result in modifications, cancellations, or delays of our current orders and potential penalties. Additionally, project execution or completion relies on the cooperation of clients and other service providers & excavation (ROU) right of use permissions from local authorities involved like non-gasification of the awarded area/locations, change in client project management agencies, scarcity/shortage in supply of free issue materials by the client. Factors beyond our or our clients' control, such as permit delays or practical difficulties, may lead to project postponements. Due to uncertainties in project execution, we cannot accurately predict when, if, or to what extent a project will be completed, impacting the income and profits derived from the contracts. Delays can also lead to payment delays or refusals, affecting expected margins. Delays, scope reductions, cancellations, execution difficulties, payment postponements, defaults, or disputes related to the Order Book or ongoing projects can adversely affect cash flow, operational revenues, and profitability. These inherent risks in our industry and contractual relationships must be recognized as they can significantly impact on our financial performance.

28. *Our financing agreements contain covenants that limit our flexibility in operating our business. If we are not in compliance with certain of these covenants and are unable to obtain waivers from the respective lenders, our lenders may accelerate the repayment schedules, and enforce their respective security interests, leading to a material adverse effect on our business and financial condition.*

A portion of borrowings is secured by hypothecation of current assets (both present and future), mortgage of our promoters' personal properties, for further details, please refer the chapter titled “*Financial Indebtedness*” beginning on page 262 of this Prospectus. Our existing financing arrangements contain a number of restrictive covenants that impose significant operating and financial restrictions on us and may limit our ability to, without prior consents from the lenders, engage in acts that may be in our long-term best interest, including restrictions on our ability to, among other matters, make regular inspections and audits. If we are not in compliance with certain of these covenants and are unable to obtain waivers from the respective lenders or if any events of default occur, our lenders may accelerate the repayment schedules or terminate our credit facilities. However, there have not been any instances in the past that adversely affected the Company's business, credit ratings, prospects, results of operations and financial condition, due to restrictive covenants of the debt financing agreements. Further, certain of our subsisting loans may be recalled at any time at the option of the lender. There can be no assurance that the lenders will not recall such borrowings or if we will be able to repay loans advanced to us in a timely manner or at all. Subsequently, if we are unable to pay our debt, affected lenders could also proceed against any collateral granted to them to secure such indebtedness. Further, such covenant defaults could result in cross-defaults in our other debt financing agreements. In the event our lenders accelerate the repayment of our borrowings, there can be no assurance that we will have sufficient assets to repay our indebtedness. If our future cash flows from operations and other capital resources become insufficient to pay our debt obligations or our contractual obligations, or to fund our other liquidity needs, we may be forced to sell assets or attempt to restructure or refinance our existing indebtedness. Our ability to restructure or refinance our debt will depend on the condition of the capital markets, our financial condition at such time and the terms of our other outstanding debt instruments. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. The terms of existing or future debt instruments may restrict us from adopting some of these alternatives. In addition, any failure to make payments of interest or principal on our outstanding indebtedness on a timely basis would likely result in a reduction of our creditworthiness or credit rating, which could harm our ability to incur additional indebtedness on acceptable terms.

29. *Delays in completion of our current and future projects and time overrun could have adverse effect on our business prospects and results of operations.*

Typically, our projects are subject to specific completion schedule requirements. The scheduled completion targets for our projects are estimates and are subject to delays as a result of, among other things, unforeseen engineering problems, force majeure events, unavailability of financing, unanticipated cost increases or changes in scope and inability to obtain government approvals or as may be contractually agreed with the client. We also provide bank guarantees to our clients which may be invoked if we are unable to complete projects within a specified time frame and such guarantees may be extended owing to any change in such timelines. Failure to adhere to contractually agreed timelines could lead to forfeiture of security deposits, payment of liquidated damages and/ or our performance guarantees being invoked. There can be no assurance that our projects will be completed within the specified time frame. While there have been no instances of time overrun in the past, we cannot assure you that all potential liabilities that may arise from delays or that any damage, that may be claimed for such delays from clients or any third party, would be adequate to cover losses resulting there from.

30. *Within the parameters as mentioned in the chapter titled “Objects of the Issue” beginning on page 116 of this Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use the Net Proceeds for the purposes described in the section titled “*Objects of the Issue*” on page 116 of this Prospectus. The Objects of the Issue comprise of funding of capital expenditure requirements of our Company towards setting up of corporate office in Surat, Gujarat, funding of capital expenditure requirements of our Company towards purchase of machineries, funding working capital requirements and general corporate purposes. We intend to deploy the Net Proceeds in FY 2025-26, such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Net Proceeds, please refer chapter titled “*Objects of the Issue*” beginning on page 116 of this Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled “*Objects of the Issue*” beginning on page 116 of this Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue. Our Board of Directors will monitor the proceeds of this Issue. However, Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. However, in accordance with Section 27 of the Companies Act, 2013, and relevant provisions of SEBI ICDR Regulations, 2018, a company shall not vary the objects of the Issue without our Company being authorized to do so by our shareholders by way of special resolution and other compliances in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

31. *We require working capital for our smooth day-to-day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.*

Our business demands on working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. We intend to continue growing by expanding our business operations. This may result in increase in the quantum of our current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “*Objects of the Issue*” beginning on page 116 of this Prospectus.

- 32. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further we have not identified any alternate source of financing the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, business operations and financial condition.***

As on date of this Prospectus, we have not made any alternate arrangements for meeting our capital requirements for objects of the issue. We meet our capital requirements through, owned funds, debt and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the net issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “Objects of the Issue” beginning on page 116 of this Prospectus.

- 33. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.***

Since, the Proceeds from the Issue is less than Rs.10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, as per the Section 177 of the Companies Act, 2013 and applicable laws, the Audit Committee of our Company would be monitoring the utilization of the Issue Proceeds.

- 34. *The average cost of acquisition of Equity Shares by our Promoters could be lower than the Issue Price to be decided by the Company in consultation with the Book Running Lead Manager in accordance with the SEBI ICDR Regulations.***

Our Promoters’ average cost of acquisition of Equity Shares in our Company could be lower than the Price decided by our Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title “Capital Structure” beginning on page 94 of this Prospectus.

- 35. *Our business operations may be adversely affected due to misconduct or errors from employees. Such incidences could adversely affect our financial condition, results of operations and reputation.***

Employee misconduct or errors could adversely affect business risks or losses, including regulatory sanctions, and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity like reflective jackets, safety shoes, non-sparking tools, connectivity with local hospitals in case of emergencies may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, operations and goodwill could be adversely affected.

- 36. *Failure to successfully implement our business strategies may materially and adversely affect our business, prospects, financial condition and results of operations.***

We aim to implement our business strategies to ensure future business growth, which may be subject to various risks and uncertainties, including but not limited to the following:

- **Cost and Rate Fluctuations:** Fluctuations in the costs of labour, equipment, and interest rates may impact project economics and profitability.
- **Maintaining Competitive Edge:** We face the risk of cost overruns or delays in project execution, which could erode our competitive advantage and reputation. Failing to deliver projects in a timely manner or meeting quality specifications may hinder our growth prospects.

- **Intensified Competition and Payment Issues:** We operate in a competitive landscape, and intensified competition may affect our ability to secure contracts. Delays in payments by clients and associated legal proceedings may also pose financial and operational challenges.
- **Operational Efficiency:** Inefficiency in utilizing our execution system and ERP systems may affect project performance and operational results.
- **Financing Challenges:** Managing financing resources and obtaining funds at affordable costs are critical for our business growth. Failure to maintain financial discipline may affect our ability to undertake projects.
- **Regulatory and Political Environment:** Changes in laws, regulations, policies, or the political environment could impact our business operations and profitability.
- **Diversification and Business Segments:** Expanding into new states or business segments involves inherent risks, including market acceptance and operational challenges.
- **Talent Acquisition and Retention:** Skilled employees play a vital role in our success. Difficulty in recruiting and retaining talent could affect our operations and project execution.
- **Market Trends and Portfolio Optimization:** Failure to identify market trends or optimize our project portfolio may hinder our ability to acquire new projects and meet client expectations.
- **Corrupt Practices:** The risk of fraud or improper conduct may adversely affect our reputation and financial standing.

Implementation of our strategies may be subject to a number of risks and uncertainties including the ones mentioned above, some of which are beyond our control. There can be no assurance that we will be able to execute our growth strategy on time and within the estimated costs, or that we will meet the expectations of our clients. In order to manage growth effectively, we must implement and improve operational systems, procedures and controls on a timely basis, which, as we grow and diversify, we may not be able to implement, manage or execute efficiently and in a timely manner or at all, which could result in delays, increased costs and diminished quality and may adversely affect our results of operations and our reputation. Any failure or delay in the implementation of any of our strategies may have a material adverse effect on our business, prospects, financial condition and results of operations.

37. ***Our Registered Office and other properties used for business operations are not owned by us and are taken on rental basis. If we are unable to renew existing rental agreements or relocate our operations on commercially reasonable terms, there may be a material adverse effect on our business, financial condition, results of operations and cash flows could be adversely affected.***

Our registered office and other properties used for business operations are not owned by us and are taken on rental basis. For further details, see “Our Business” beginning on page 154 of this Prospectus. If we are unable to renew certain or all of these rental agreements on commercially reasonable terms or at all and we cannot relocate our offices in a timely manner, we may suffer a disruption in our operations, and our results of operations, financial condition and cash flows may be materially and adversely affected. Further, we cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new offices and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

38. ***Our agreement for obtaining office containers on rent are not stamped as a result of which our title to such properties may be faulty.***

We have not paid stamp duty for our agreement with obtaining office containers at our project site. The admissible as evidence in legal proceedings and legally enforce the same, except after paying differential stamp duty and/or penalty for inadequate stamping. The effect of non-registration of an instrument is that the title to the property does not transfer in favour of the transferee and therefore, making the instrument unenforceable. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

M/s. Akash Services dated May 24, 2024 for effect of not stamping is that the document is not parties to that agreement may not be able to

- 39. *Our Promoters have provided personal guarantees for loan facilities obtained by our Company, and any failure or default by our Company to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations on them, which may impact their ability to effectively service their obligations as our Promoters and thereby, impact our business and operations.***

Our Promoters have extended personally guarantee towards loan facilities taken by our Company. Any default or failure by us to repay the loans in a timely manner, or at all could trigger repayment obligations of our guarantors in respect of such loans, which in turn, could have an impact on their ability to effectively service their obligations as Promoters of our Company, thereby having an effect on our business, results of operation and financial condition. Furthermore, in the event that these individuals withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details, please refer the chapter titled “Financial Indebtedness” beginning on page 262 of this Prospectus.

- 40. *We are required to furnish financial and performance bank guarantees as part of our business. Our inability to arrange such guarantee or the invocation of such guarantees may result in forfeiture of bid security or earnest money deposit and termination of the relevant contract thereby affecting results of our operations, financial condition and other prospects.***

As per the terms of the work orders executed by us, we are required to provide financial and performance bank guarantees in favour of the clients to secure our financial/performance obligations under the respective contracts for our projects and are also required to ensure that the performance bank guarantees are valid and enforceable until the expiry of the contract or until we remedy any defects during the defects liability period or until such other period as is stipulated under the relevant contract. We may be unable to fulfil any or all of our obligations under the contracts entered into by us in relation to our ongoing projects due to unforeseen circumstances which may result in a default under our contracts resulting in invocation of the bank guarantees issued by us. If any or all the bank guarantees are invoked, it may result in a material adverse effect on our business and financial condition. Further, if we are not able to provide/extend the performance bank guarantee within the stipulated period with respect to the project, then the relevant contract may be terminated and the bid security provided can be encashed or balance receivables can be taken by the client to recover such loss, which could have a material adverse effect on our prospects.

We may not be able to continue obtaining new financial and performance bank guarantees in sufficient quantities to match our business requirements. If we are unable to provide sufficient collateral to secure the financial bank guarantees, performance bank guarantees, our ability to enter into new contracts could be limited. Providing security to obtain financial and performance bank guarantees also increases our working capital requirements.

- 41. *The logo “ ” has been registered under the name of our company. Any failure to protect our intellectual property could have a material adverse effect on our business. We are, and may also in the future be, subject to intellectual property infringement claims, which may be expensive to defend and may disrupt our business.***

As on date of this Prospectus, the logo “
1999 and the status of the same is ‘Send

” has been registered under Class 37 of the Trade Mark Act, To Vienna Codification’. The said trademark belongs to our brand, if Company could not register it or it gets rejected, we will not be able to make use of the said trademark, name or logo in connection with our business and consequently, we may be required to invest significant resources in changing our logo which may adversely affect our reputation and business. We have been conducting our

business using our logo and our customers associate our logo with our Company and its operations. Our ability to compete effectively depends in part upon our ability to protect our rights in trademarks and other intellectual property that we have been registered. We seek to protect our logos, brand names and websites' domain names by relying on trademarks and domain name registrations. However, our efforts to protect our intellectual property may not be adequate. The use of our name and logo is vital to our competitiveness and success and for us to attract and retain our customers and business partners. Further, we cannot assure you that the measures we have taken will be sufficient to prevent any misappropriation or infringement of our intellectual property.

42. *Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.*

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled “*Financial Indebtedness*” beginning on page 262 of this Prospectus.

43. *Inaccurate estimation of risks, revenues, or costs for a project could negatively impact our profitability and operational results. Actual costs during project execution may significantly deviate from bid assumptions, leading to challenges in recovering additional expenses and potentially having a material adverse effect on our operational results, cash flows, and financial condition.*

Under the agreements for our projects, we typically agree to a price escalation clause or changes in minimum wages rates as per regulation/notification from State or Central Government, fuel price variation. However, some of our future projects may not include price escalation clauses, leaving us exposed to potential cost variations. As a result, the actual expenses incurred during these projects may significantly differ from the bid assumptions due to various factors. These factors include unanticipated increases in material, fuel, labour, or other input costs, unexpected conditions leading to delays and higher expenses, weather-related disruptions, and non-performance by suppliers.

If we are unable to pass on cost increases to clients due to limited or no price escalation provisions, our profitability may be adversely affected, and we could incur financial losses. Additionally, the inherent risks in the industry may result in lower profits than initially estimated or lead to cost and time overruns, potentially impacting our cash flows, overall business, financial health, and operational results.

The accurate estimation of risks, revenues, and costs for a project is critical to ensure profitability and operational success. Any inaccuracies in these estimates can have detrimental effects on our financial performance. During project execution, actual costs may vary significantly from the initial bid assumptions, making it challenging to recover additional expenses. Such deviations can have a material adverse impact on our operational results, cash flows, and overall financial condition.

44. *Our Company's activities are labour intensive and depend on availability of labour. In case of unavailability of such labour, our business operations could be affected.*

Our business operations are labour intensive and depends on our ability to retain labour. In case such labour is unavailable or we are unable to identify and retain such labour our business could be adversely affected. We cannot guarantee that we may be able to continue with the same on favourable terms or at all. Any such failure may impact the operations, business process and profitability. Additionally, we have seen an increasing trend in manpower costs in India, which has had a direct impact on our employee costs and consequently, on our margins. Further, the minimum wage laws in India may be amended leading to upward revisions in the minimum wages payable in one or more states. We may need to increase compensation and other benefits in order to attract and retain key personnel in the future and that may materially affect our costs and profitability. We cannot assure you that as we continue to grow our business in the future, our employee costs coupled with operating expenses will not significantly increase.

Any strikes or lockouts, work stoppages, slowdowns, shutdowns, supply interruptions or costs or other factors beyond our control, may disrupt our operations and could negatively impact our financial performance or financial condition. Additionally, our inability to recruit employees, in particular skilled employees, and retain our current workforce could have a material adverse effect on our business, financial condition and profitability. There can be no assurance that we will not experience slowdowns or shutdowns in the manner described above, or in any other manner, in the future, for reasons which are beyond our control. Any slowdown or shutdown will adversely impact the results of operations, market share and financial condition.

45. Employee misconduct including fraud, theft, employee negligence, misuse of confidential data or similar incidents may adversely affect the results of operations and financial condition.

Our company faces potential risks related to incidents of theft or damage to inventory. We acknowledge that there is a possibility of experiencing inventory losses due to various factors such as employee theft, vendor fraud, and general administrative errors. These incidents could have a negative impact on the results of operations and financial condition. During the execution of the contract and up to defect liability period we are generally fully liable to compensate all concerned for any loss, damage, or destruction of work, structure, property etc. including third party risk arising due to causes attributable to us.

Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance. Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for the company.

Although we closely monitor our employees, misconduct, including acts of bribery, corruption or fraud by employees or executives, such acts could include binding us to transactions that exceed authorized limits or present unacceptable risks, or they may hide unauthorized or unlawful activities from us, which may result in substantial financial losses and damage to our reputation and loss of business from our customers. Employee or executive misconduct could also involve the improper use or disclosure of confidential information, which could result in regulatory sanctions and serious reputational or financial harm, including harm to our reputation. While we have not experienced any such employee misconduct in the past, it is not always possible to deter employee or executive misconduct and the precautions taken and systems put in place to prevent and detect such activities may not be effective in all cases. Any instances of such misconduct could adversely affect our business and our reputation.

46. Failure or disruption of our information technology systems may adversely affect our business, financial condition, results of operations, cash flows and prospects.

We have implemented required information technology solutions to cover key areas of our operations including sourcing, accounting and data security. However, these systems are potentially vulnerable to damage or interruption from a variety of sources, which could result in a material adverse effect on our operations. Our ability to keep our business operating depends on the proper and efficient operation and functioning of the information technology systems, which are susceptible to malfunctions and interruptions (including those due to equipment damage, power outages, computer viruses and a range of other hardware, software and network problems). Such malfunction or disruptions could interrupt our business operations and result in economic losses. Any failure of our information technology systems could also cause damage to our reputation which could harm our business. Any of these developments, alone or in combination, could have a material adverse effect on our business, financial condition, results of operations and cash flows.

There is no assurance that we will not experience disruption in our information technology systems in the future and we will be able to remedy such disruption in timely manner, or at all. Any such disruption of our information technology systems could have a material adverse effect on our business, results of operation and financial condition.

- 47. Our insurance coverage may not adequately protect us against all losses or the insurance coverage may not be available for all the losses as per the insurance policy, which could adversely affect business, financial condition and results of operations.**

Our operations are subject to various risks inherent to the construction, installation, operation and maintenance of mainly gas pipelines, installation of cables for power distribution, structural foundations for water distribution and renewable energy projects. We are also required to take appropriate insurance for our projects under the terms of our contracts. We avail inland cargo insurance policy to insure inland movement of plant & machinery by road or rail as per project requirements. These insurance policies are reviewed periodically to ensure that the coverage is adequate. We believe that our insurance coverage is in accordance with industry custom, including the terms of and the coverage provided by such Insurances. Our policies are subject to standard limitations. For further details of insurance policies availed by us, please see insurance details as disclosed under chapter titled “Our Business” on page no. 154 of this Prospectus.

- 48. Industry information included in this Prospectus has been derived from industry reports. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.**

Statements from third parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

- 49. The recent outbreak of the novel coronavirus could have a significant effect on our results of operations, and could negatively impact our business, revenues, financial condition and results of operations.**

An outbreak of COVID-19 was recognized as a pandemic by the WHO on March 11, 2020. In response to the COVID-19 outbreak, the governments of many countries, including India, have taken preventive or protective actions such as imposing country-wide lockdowns, as well as restrictions on travel and business operations. Since May 2020 many of these measures our operations and to build confidence in the safety protocols deployed at our office. If we do not respond appropriately to the pandemic, or if customers do not perceive our response to be adequate, we could suffer damage to our reputation and our brand, which could adversely affect our business in the future. Further, the lockdown was again imposed by the government in some parts of India during April 2021, which was partially relaxed in June 2021, during this lockdown although we have continued with our business, the execution of our business operations was delayed by few weeks. We cannot predict the degree to, or the time period over, which our business will be affected by the COVID-19 outbreak. For example, this pandemic could necessitate further lockdowns, resulting in significant additional effects on our revenue, financial condition and results of operations. There are numerous uncertainties associated with the COVID-19 outbreak, including the number of individuals who will become infected, availability of a vaccine or a cure that mitigates the effect of the virus, the extent of the protective and preventative measures imposed by governments and whether the virus’ impact will be seasonal, among others. Consequently, there may be adverse effects of this pandemic on our short-term business operations and our financial results may be impacted.

50. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.*

After the completion of the Issue, our Promoters and Promoter Group is expected to hold 58.12% of the Post Issue Equity Share Capital. Further, the involvement of our Promoters in our operations, including through strategy, direction and customer relationships have been integral to our development and business and the loss of any of our Promoters may have a material adverse effect on our business and prospects.

Accordingly, our Promoters and Promoter Group will continue to exercise significant influence over our business and all matters requiring shareholders' approval, including the composition of our Board of Directors, the adoption of amendments to our constitutional documents, the approval of mergers, strategic acquisitions or joint ventures or the sales of substantially all of our assets, and the policies for dividends, investments and capital expenditures. This concentration of ownership may also delay, defer or even prevent a change in control of our Company and may make some transactions more difficult or impossible without the support of our Promoters and Promoter Group. Further, the Promoters' shareholding may limit the ability of a third party to acquire control. The interests of our Promoters and Promoter Group, as our Company's controlling shareholder, could conflict with our Company's interests, your interests or the interests of our other shareholders. There is no assurance that our Promoters and Promoter Group will act to resolve any conflicts of interest in our Company's or in investor favor.

51. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "Dividend Policy" on page 220 of this Prospectus.

52. *Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors assessments of Our Company's financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Our restated financial statements, including the financial statements provided in this Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, refer chapter titled "Presentation of Financial Industry and Market Data" beginning on Page 21 of this Prospectus.

Accordingly, the degree to which the Indian GAAP financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited. India has decided to adopt the "Convergence of its existing standards with IFRS" and not the "International Financial Reporting Standards" ("IFRS"), which was announced by the MCA, through the press note dated January 22, 2010. These "IFRS based / synchronized Accounting Standards" are referred to in India as IND (AS). Public companies in India, including our Company, may be required to prepare annual and interim financial statements under IND (AS). The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an

exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of IND (AS) by a SME exchange listed Company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Indian GAAP and IFRS or to quantify the impact of the difference between Indian GAAP and IFRS as applied to its financial statements. There can be no assurance that the adoption of IND-AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt IND-AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results will vary significantly due to the convergence to IND (AS), given that the accounting principles laid down in the IND (AS) are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards, i.e., IND (AS) and for future periods.

Moreover, if we volunteer for transition to IND (AS) reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of IND (AS)-experienced accounting personnel available as more Indian companies begin to prepare IND (AS) financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

53. The determination of the Price Band is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares upon listing on the Stock Exchange.

The determination of the Price Band is based on various factors and assumptions, and will be determined by our Company in consultation with the Book Running Lead Manager. Furthermore, the Issue Price of our Equity Shares has been determined by book building method. These will be based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 129 of this Prospectus) and may not be indicative of the market price of our Equity Shares upon listing on the Stock Exchange. The price of our Equity Shares upon listing on the Stock Exchange will be determined by the market and may be influenced by many factors outside of our control.

EXTERNAL RISKS

54. An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

55. A slowdown in our exports due to tariffs and trade barriers and international sanctions could adversely affect our business, financial condition and results of operations.

A significant portion of our revenue is derived from exports. From time to time, tariffs, quotas and other tariff and non-tariff trade barriers may be imposed on our products in jurisdictions in which we operate or seek to sell our products. There can be no assurance that the European Community and the United States, among others, where we seek to sell our products will not impose trade restrictions on us in future. We may also be prohibited from exporting to certain restricted countries that may be added to a sanctions list maintained by the Government of India or other foreign governments, such as the Specially Designated Nationals and Blocked Persons list maintained by the Office of Foreign Assets Control of the US Department of Treasury in the United States. In February 2022, hostilities between Russia and the Ukraine commenced, which has led to the imposition of sanctions of various Russian interests (and in some cases Belarus) by the European Union, Australia, Canada, Japan, New Zealand, Switzerland, South Korea, the United Kingdom and the United States. Any such imposition of trade barriers or international sanctions may have an adverse effect on our business, financial condition and results of operations.

56. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the stock exchange(s) in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and

trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the stock exchange(s). Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

57. Any future issuance of Equity Shares may dilute your shareholding and sale of our Equity Shares by our Promoters or other shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issuances by us, including in a primary offering, may lead to the dilution of investors' shareholdings in our Company. Any future equity issuances by us or sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

58. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any time.

59. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company is generally taxable in India. A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realized on the sale of listed equity shares held for more than 12 months may be subject to long-term capital gains tax in India at the specified rates depending on certain factors, such as STT paid, the quantum of gains and any available treaty exemptions. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. Further, any gain realized on the sale of our Equity Shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. While non-residents may claim tax treaty benefits in relation to such capital gains income, generally, Indian tax treaties do not limit India's right to impose tax on capital gains arising from the sale of shares of an Indian company.

Pursuant to the Finance Act, 2020 and after March 31, 2020, dividends declared, distributed or paid by a domestic company would not be exempt in the hands of both resident and non-resident shareholders and are subject to tax deduction at source. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action including dividends. Further, the Finance Act, 2019 introduced new provisions under the Indian Stamp Act, 1899, which provide that in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures, on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount.

We cannot predict whether any tax laws or other regulations impacting it will be enacted, or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our business, results of operations and financial condition.

60. Natural calamities, climate change and health epidemics could adversely affect the Indian economy and our business, financial condition, and results of operations. In addition, hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect our business, financial condition and results of operations.

Our operations including our offices may be damaged or disrupted as a result of natural calamities. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations. Damage or destruction that interrupts our provision of services could adversely affect our reputation, our relationships with our customers, our management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our offices. Any of the above factors may adversely affect our business, financial condition and results of operations. India has from time-to-time experienced instances of social, religious and civil unrest and hostilities between neighbouring countries. Military activity or terrorist attacks in the future could influence the Indian economy by disrupting communications and making travel more difficult and such political tensions could create a greater perception that investments in Indian companies involve higher degrees of risk. Events of this nature in the future, as well as social and civil unrest within other countries in Asia, could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies.

61. Foreign investors are subject to foreign investment restrictions under Indian laws that may limit our ability to attract foreign investors, which may have a material adverse impact on the market price of the Equity Shares.

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA and the rules thereunder. Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required.

Shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure you that any required approval from the RBI or any other governmental agency can be obtained on any particular terms, or at all. Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT as consolidated in the FDI Policy with effect from October 15, 2020, and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which share a land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, will require prior approval of the Government of India. Any such approval(s) would be subject to the discretion of the regulatory authorities. Restrictions on foreign investment activities and impact on our ability to attract foreign investors may cause uncertainty and delays in our future investment plans and initiatives. We cannot assure you that any required approval from the relevant governmental agencies can be obtained on any particular terms or at all. Further, if our Company ceases to be "owned and controlled" by resident Indian entities, we will be subject to additional investment and exit restrictions under the FDI Policy and the FEMA.

62. Changing laws, rules and regulations and legal uncertainties, including adverse application or interpretation of corporate and tax laws, may adversely affect our business, prospects and results of operations.

The regulatory and policy environment in which we operate is evolving and subject to change. Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations applicable to us and our business. In such instances, and including the instances mentioned below, our business, results of operations and prospects may be adversely impacted, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. Any political instability in India, such as corruption, scandals and protests against certain economic reforms, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well.

Additionally, the Government of India has introduced (a) the Code on Wages, 2019; (b) the Code on Social Security, 2020; (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 which consolidate, subsume and replace numerous existing central labour legislations. While the rules for implementation under these codes have not been notified, the implementation of such laws could increase our

employee and labour costs, thereby adversely impacting our results of operations, cash flows, business and financial performance.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. For instance, companies can voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which reduces the rate of income tax payable to 22% subject to compliance with conditions prescribed, from the erstwhile 25% or 30% depending upon the total turnover or gross receipt in the relevant period. Any such future amendments may affect our other benefits such as exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

Further, the GoI has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill, 2024 (“Finance Bill”), has introduced various amendments. The Finance Bill has received assent from the President of India on February 15, 2024, and has been enacted as the Finance Act, 2024. We cannot predict whether any amendments made pursuant to the Finance Act, 2024 would have an adverse effect on our business, financial condition and results of operations. Furthermore, changes in capital gains tax or tax on capital market transactions or the sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

There can be no assurance that the GoI will not implement new regulations and policies requiring us to obtain approvals and licenses from the GoI or other regulatory bodies, or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment or change to governing laws, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent in the jurisdictions in which we operate may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. It may also have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which could materially harm our results of operations or cash flows. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

We are unable to determine the impact of any changes in or interpretations of existing, or the promulgation of, new, laws, rules and regulations applicable to us and our business. If that was to occur it could result in us, our business, operations or group structure being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

63. Regulation of greenhouse gas emissions and climate change issues may adversely affect our operations.

Many governments are moving to enact climate change legislation and treaties at the international, national, state, provincial and local levels. Where legislation already exists, regulations relating to emission levels and energy efficiency are generally becoming more stringent. Some of the costs associated with meeting more stringent regulations can be offset by increased energy efficiency and technological innovation. However, if the current regulatory trend continues, meeting more stringent regulations is anticipated to result in increased costs, and this may have a material adverse impact on our financial condition and results of operations. Further, India and many other nations are signatories to international agreements related to climate change including the 1992 United Nations Framework Convention on Climate Change, which is intended to limit or capture emissions of greenhouse gas, such as carbon dioxide and the 2016 Paris Agreement, which extended the potentially binding set of emissions targets to all nations. Our compliance with any new environmental laws or regulations, particularly relating to greenhouse gas emissions, may require significant capital expenditure or result in the incurrence of fees and other penalties in the

event of non-compliance. We cannot guarantee that future legislative, regulatory, international law, industry, trade or other developments will not negatively impact our operations and the demand for the products we sell. If any of the foregoing were to occur, our business, financial condition and results of operations may be adversely affected.

64. *Our business is substantially affected by prevailing economic, political, social and other conditions which may harm our ability to do business, increase our costs and negatively affect our stock price.*

We are incorporated in and all our operations are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations and cash flows are significantly affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations and cash flows, may include:

- any increase in Indian interest rates or inflation;
- any exchange rate fluctuations;
- any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporates;
- volatility in, and actual or perceived trends in trading activity on India's principal stock exchanges;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- occurrence of natural or man-made disasters;
- prevailing regional or global economic conditions, including in India's principal export markets;
- any downgrading of India's debt rating by a domestic or international rating agency;
- financial instability in financial markets; and
- other significant regulatory or economic developments in or affecting India or its construction sector.

On February 24, 2022, Russian military forces invaded Ukraine. Although the length, impact and outcome of the ongoing military conflict in Ukraine is highly unpredictable, this conflict and responses from international communities could lead to significant market and other disruptions, including significant volatility in commodity prices and supply of energy resources, instability in financial markets, supply chain interruptions, political and social instability, changes in consumer or purchaser preferences as well as increase in cyberattacks and espionage.

To date, we have not experienced any material interruptions in our supply chain, manufacturing facility and distribution network in connection with these conflicts. We have no way to predict the progress or outcome of the conflict in Ukraine as the conflict, and any resulting government reactions, are rapidly developing and beyond our control. The extent and duration of the military action, sanctions and resulting market disruptions could be significant and could potentially have a substantial impact on the global economy and our business for an unknown period of time. Any of the abovementioned factors could affect our business, financial condition and results of operations.

In addition, any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely affect our business, results of operations, cash flows and financial condition and the price of the Equity Shares.

65. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect

business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

66. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

67. *Changing regulations in India could lead to new compliance requirements that are uncertain. The regulatory environment in which we operate is evolving and is subject to change.*

The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements. The regulatory and policy environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations and policies that could affect our business in general, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the Government and other regulatory bodies, or impose onerous requirements.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy in the jurisdictions in which we operate, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, financial condition, results of operations and prospects.

68. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

In recent months, consumer and wholesale prices in India have exhibited increased inflationary trends, as the result of an increase in crude oil prices, higher international commodity prices, and higher domestic consumer and supplier prices. The Consumer Price Index increased from 3.4% (average) in Fiscal 2019 to 4.8% (average) in Fiscal 2020 to an estimated 6.2% (average) in Fiscal 2021 although the RBI has enacted certain policy measures designed to curb inflation, these policies may not be successful. In February 2022, hostilities between Russia and the Ukraine commenced. The market price of oil has risen sharply since the commencement of these hostilities which could have an inflationary effect in India. Continued high rates of inflation may increase our expenses related to salaries or wages payable to our employees, raw materials and other expenses. There can be no assurance that we will be able to pass on any additional expenses to our customers or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our business, financial condition and results of operations.

69. *A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian Law.*

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company. Under the SEBI SAST Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of SEBI SAST Regulations.

70. Our Equity Shares have never been publicly traded, and, after the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained after the Issue. Listing and quotation do not guarantee that a market for our Equity Shares will develop or, if developed, does not guarantee the liquidity of such market for the Equity Shares. Our Company and the Book Running Lead Manager will appoint Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments. Investors might not be able to rapidly sell the Equity Shares at the quoted price if there is no active trading in the Equity Shares. The Issue Price of the Equity Shares has been determined by our Company in consultation with the BRLM through the Book Building Process.

71. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have in the past experienced substantial dislocations, liquidity disruptions and market corrections.

72. Rights of shareholders of companies under Indian law may be different compared to the laws of other jurisdictions.

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as a shareholder in an Indian company than as a shareholder of an entity in another jurisdiction.

- 73. QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid, and Retail Individual Investors are not permitted to withdraw their Bids after Bid/ Issue Closing Date.***

Pursuant to the SEBI ICDR Regulations, Qualified Institutional Buyers and Non-Institutional Investors are required to pay the Bid Amount on submission of the Bid and are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Similarly, Retail Individual Investors can revise or withdraw their Bids at any time during the Bid/ Issue Period and until the Bid/ Issue Closing Date, but not thereafter. Therefore, Qualified Institutional Buyers and Non-Institutional Investors will not be able to withdraw or lower their Bids following adverse developments in international or national monetary policy, financial, political or economic conditions, our business, results of operations or otherwise at any stage after the submission of their Bids.

DETAILS OF THE OBJECTS OF THE ISSUE

1. Funding of capital expenditure requirements towards setting up of corporate office in Surat, Gujarat:

Our Company is mainly engaged in providing infrastructure and maintenance services to city gas distribution divisions in India. Our major operations are carried from the state of Gujarat and for the period ended September 30, 2024 and for the financial year ended on March 31, 2024, 2023 and 2022, respectively, our revenue from the state of Gujarat comprises of 39.41%, 54.10%, 51.13% and 50.71% of our total revenues from operations.

In line with our strategic objectives and enhance workflow efficiency, we intend to set-up a corporate office in Surat, Gujarat for our business operations. The new premise identified by our Company is situated at Building No. A, Wing No. B, Office No. 701, Swastik Universal, Next to Valentine Theatre, Dumas Road, Umra, Surat-395007, Gujarat, India (**“Proposed Corporate Office”**) having approximately 876.15 sq. ft. carpet area of office space. We propose to acquire the said property on ownership basis from Ms. Seema Sunilkumar Malani and has entered into a sale deed dated September 27, 2024 read with addendum to sale deed dated January 21, 2025, February 25, 2025 and March 24, 2025, respectively.

Currently, we have established our registered office on a rental commercial property situated at Building No. A, Wing No. B, Office No. 703, Swastik Universal, Next to Valentine Theatre, Dumas Road, Umra, Surat-395007, Gujarat, India. As on the date of this Prospectus, the registered office as well as all other place of businesses as mentioned in ‘*Our Properties*’ under chapter titled “*Our Business*” on page no. 154 are taken on rent/lease basis by the Company. This proposed expenditure will not only lead to creation of an asset for the Company but will also streamline and enhance the efficiency of business processes by consolidating resources in one location.

Objectives of capital expenditure towards setting up of corporate office in Surat, Gujarat:

- **Professional Presence:** This will enhance Company's credibility and image among clients, partners, and employees. A stable, owned office can convey professionalism and commitment to stakeholders.
- **Long-Term Security:** Ownership provides stability by eliminating concerns related to lease renewals, potential rent increases, or eviction. This security allows the company to focus on its business operations without uncertain challenges.
- **Accumulating Asset Value:** Having ownership of an office permits the Company to increase its value gradually. This contrasts with renting, where payments contribute to a landlord's asset but do not generate any ownership benefits for the tenant. Over time, as property values increase, the Company benefits from appreciation, which can enhance overall asset value.
- **Consolidation of Resources:** Having multiple offices in the same building facilitates streamlined operations. This proximity can improve communication and collaboration among teams, leading to increased productivity and efficiency.
- **Customization:** With ownership, the Company has the freedom to undertake renovations and improvements tailored to its operational needs. This customization is not typically feasible in rental agreements, where landlords may impose restrictions.

Positive impacts of purchasing corporate office in Surat, Gujarat:

- **Eliminates Rent Payments:** By purchasing office space, the Company eliminates the rental payments, which can be a significant recurring expense. Over time, this helps free up funds that can be reinvested into other business operations. For instance, the Company is currently paying rent of Rs. 65,000/- per month which is subject to increase by 5% every year for its registered office situated in the same building i.e., A-703, Swastik Universal, Next to Valentine Theatre, Dumas Road, Umra, Surat-395007, Gujarat, India (Area. 1630 sq. ft.). By owning the proposed corporate office, the Company will save such additional rent expenditures which will contribute to the growth of the Company.
- **Appreciation of Property Value:** Real estate generally appreciates over time, meaning the Company's asset will increase in value, providing a source of capital appreciation that benefits the Company in the long run.

- **Professional Image:** Owning office space plays a significant role in shaping and maintaining the professional image of the Company. Company's clients typically expect a high level of professionalism, reliability, and stability from their partners and service providers. This will also give Company the flexibility to design and alter the office layout in a way that aligns with the Company's brand identity.

This investment decision will enhance stability and support growth of the company for long-term success.

Our Board in its meeting dated February 17, 2025 took note that an amount of ₹ 104.29 Lakhs is proposed to be utilized towards capital expenditure for setting up of the proposed corporate office from the Net Proceeds. Sr. No.	List of Approvals	Stages when it is required

2.	Addition of additional place of business in GST Registration Certificate (Gujarat)	
4.	Fire NOC	Received on April 21, 2023

2. Funding of capital expenditure requirements towards purchase of machineries:

Our Company intends to purchase new concrete mixer machines for our business operations amounting to ₹ 168.04 Lakhs from the Net Proceeds. Our Company has received quotations from different suppliers for such machines and is yet to place any orders or enter into definitive agreements for purchase of machineries. The amount to be spent and machines to be procured by our Company will depend upon business requirements and technology advancement.

Objectives of capital expenditure towards purchase of machineries:

The Ajax 4 Cum machine (“AJAX machine”) is a versatile concrete mixer primarily to be used by us in the construction of overhead water tanks, sump wells and open wells in water distribution projects as well as in the construction of RCC Stub Piles for renewable energy projects like solar & renewable energy parks.

In water distribution, it plays a crucial role in speeding up the construction of overhead water tanks. The machine automates the process, significantly reducing the need for manual labour while enhancing the quality of work and saving valuable time. In addition to overhead tanks, the AJAX machine is also utilised in the construction of open wells, sump wells, receiving chambers ensuring efficient outcomes.

In the solar & renewable energy projects, the AJAX machine is used in the erection of RCC Stub Piles, which enables installation of solar modules and related construction activities. For instance, the machine aids in building RCC Stub Piles that form part of the infrastructure for solar & renewable energy projects. Additionally, when constructing Inverter Duty Transformers (IDTs) for solar parks, such as setting up infrastructure for transformers, the AJAX machine streamlines the process, reducing manpower requirements.

Our Company currently rents such machines for its operations. By purchasing the AJAX machines, we can accelerate the construction process across various projects, ensuring better output while maintaining consistent quality. The automation it provides will allow us to minimise manual intervention, save costs, optimise time, and deliver optimal results.

Benefits of purchasing concrete mixture machines:

The purchase of Ajax Machines (ARGO 4800 Non-Swivel, Kirloskar Engine with LC BS IV Engine) provides several operational and financial advantages compared to arranging similar machines on a rental or arrangement basis. Here are the key points:

1. Cost efficiency over renting:

- The cost of arranging such machines on a rental or arrangement basis is approximately Rs. 2 Lakhs per month. Over time, this rental cost accumulates and can become a significant ongoing expense. In contrast, purchasing the Ajax Machine provides long-term value, as the upfront investment will be offset by the savings from not having to pay monthly rental fees.
- Once purchased, the company will own the machine outright, eliminating recurring rental costs, which is a more cost-effective solution for long-term operations.

2. Time savings and improved productivity:

- Ajax Machines are specifically designed to perform cement mixing efficiently, which is crucial for construction projects. Typically, mixing cement manually or using site labor can be a slower process, which increases labor costs and time delays.
- The Ajax Machines are equipped with advanced concrete batch controllers that measure all the ingredients needed for quality concrete. This automation significantly reduces time spent on each batch, allowing construction teams to focus on other tasks, thereby increasing overall site productivity.

3. Operational efficiency and versatility:

- The Ajax Machine (ARGO 4800 Non-Swivel) offers high gradeability and is capable of operating efficiently even on steep inclined terrains, which is often a challenge for manual labor or other machinery. This makes the machine suitable for a wide range of construction environments. The machine’s technology ensures that concrete can be delivered even in inclined positions, improving site flexibility and reducing the risk of concrete wastage or misplacement.

4. High-quality concrete production:

- With its concrete batch controller, the cement results in:
 - **Fewer Defects:** Minimizing errors and variations in the concrete mixture.
 - **Reduced Rework Costs:** Quality concrete reduces the need for rework or repairs, lowering overall construction costs.

5. Reduced Manual Labor Costs:

- Using manual labor for cement mixing increases the cost of labor and the potential for inefficiency. While Ajax Machines require skilled operators, they reduce the need for extensive manual labor on-site, leading to additional savings in labor costs.

6. Long-Term Investment:

- The purchase of Ajax Machines is an investment in the company's construction capabilities. The machine will be available for use across multiple projects, ensuring that the company benefits from its full potential without the need for continual rental contracts.

7. Improved Project Management:

- With Ajax Machines, the company can schedule and plan projects more effectively. Having the machine available at all times allows for greater flexibility in project timelines, reducing delays caused by reliance on rented machinery.

Conclusion:

Purchasing Ajax Machines provides various financial benefits as compared to renting them. It offers the Company to save rental costs, enhances operational efficiency, ensuring quality concrete production and reduces labor costs. This investment supports the company's long-term growth and ability to deliver its projects on time with fewer delays and lower operational costs.

(e) The quotations relied upon by us in arriving at the above cost are valid for a specific period of time and may lapse after the expiry of the said period. 3. Funding Working Capital Requirements of our Company:

We fund a majority of our working capital requirements in the ordinary course of business from various banks, unsecured loan and internal accruals. Our Company requires additional working capital for funding its incremental working capital requirements and unlocking the internal accruals deployed in working capital. The funding of the incremental working capital requirements will lead to a consequent increase in our profitability, ability to utilize internal accruals for growth opportunities and achieving the proposed targets as per our business plan.

Basis of estimation of incremental working capital requirement:

Our Company proposes to utilize ₹1,800.00 Lakhs of the Net Proceeds in Fiscal 2025-26 towards our Company's working capital requirements. The balance portion of our Company's working capital requirement shall be met from the working capital facilities availed and internal accruals.

The incremental and proposed working capital requirements, as approved by the Board pursuant to a resolution dated March 19, 2025 and key assumptions with respect to the determination of the same are mentioned below. Assumptions for working capital projections made by our Company:

Our Company is engaged in providing infrastructure and maintenance services to city gas distribution divisions in India which require us to maintain both technical and financial proficiency to participate in tenders. Our Company has recently begun offering services in the power division, focusing on the installation, connectivity, commissioning, and erection of Low Tension (LT) and High Tension (HT) cables. Technical eligibility is evaluated based on past experience in executing various types and capacities of city gas distribution and power division. Financial eligibility, on the other hand, is determined on certain financial parameters such as average turnover of the last three years and the availability of banking facilities for Bank Guarantees/Letters of Credit. To secure projects, our company is required to provide a Performance and Security Deposit Bank Guarantee equal to a fixed percentage of the work Order, which will be intact with the authority until successful completion of the work.

The Performance Bank Guarantee is retained by the customer until the commission of such work. Hence, our Company requires significant amount of working capital in order to bid for projects to meet its existing order book. The non-fund based limit is secured by our Company against margin of Fixed Deposits. This amount of Fixed Deposit is classified under 'Non-Current Investment' in the Restated Financial Statements and management is of the opinion that same should be classified as part of non current investment until the same is released by the authority.

Key factors contributing to our Projected Working Capital Requirements:

Justification of Inventory increased in FY 24-25:

(Rs. In Lakhs)

Particulars	Actual figure as at September 30, 2024	Estimated figure as at March 31, 2025
Inventories	207.17	791.65

The inventories include raw materials like Galvanized Iron (GI) Pipes, HDPE pipes, Cement, etc. Usually, our clients provide us the raw materials required to complete the projects. However, the inventory is expected to increase for the period ended March 31, 2025 mainly because the Company has taken orders from some of its clients, where the raw materials are to be procured by Company itself thereby resulting in the increase of inventory for the last quarter.

Justification of Increase in Trade Receivables in FY 24-25:

Past trend of booking revenue in Quarter 4:

The Company had booked major revenue around a range of 44% to 51% in Quarter 4 in past years. This is majorly attributed to projects having deadline nearly at the end of a financial year. The details of quarterly revenue earned by the Company in Quarter 4 from F.Y. 2021-22 to FY 2023-24 are as follows:

(Rs. In Lakhs except percentages)

Month	Sales (Rs.)		Month	Sales (Rs.)		Month	Sales (Rs.)
Jan-24	147.11		Jan-23	172.65		Jan-22	142.76

Mar-24	844.40		Mar-23	446.16		Mar-22	362.51
Quarter – 4	1,234.70		Quarter – 4	1,071.52		Quarter – 4	745.67
Add: WIP (23-24)	143.98		Add: WIP (22-23)	425.07		Add: WIP (21-22)	145.21
Total	1,378.69		Total	1,496.60		Total	890.88

FY 2023-24	% of Sales		FY 2022-23	% of Sales		FY 2021-22	% of Sales
Percentage of Quarter 4 Sales (Sales + Closing WIP) to Total Sales	46.91%		Percentage of Quarter 4 Sales (Sales + Closing WIP) to Total Sales	51.21%		Percentage of Quarter 4 Sales (Sales + Closing WIP) to Total Sales	44.88%

Key Justifications:

Inventory	<p>The company is in the business of city gas distribution where invoices are raised on completion of certain stages, thus the Inventory includes WIP at the sites. This WIP at site stand basically due to not certifying of work by the engineer, which gets certified and accepted in next running bill.</p> <p>Further our company has implemented a strategy of bulk procurement of raw material and consumable to timely deliver the large projects which also enable us to get the raw material at discounted prices. Bulk purchasing helps improve long-term profit margins but also increases short-term working capital requirements for which company will need to maintain higher inventory levels compared to previous years.</p> <p>The company had inventory days of around 15 days in Fiscal 2024. The inventory is expected to increase for the period ended March 31, 2025 mainly because the Company has taken orders from clients where the raw materials are to be procured by Company itself thereby resulting in the increase of inventory for the last quarter. Our Company ensures that it can meet project timelines and avoid supply chain disruptions, which is essential for maintaining client satisfaction. This approach, while effective for cost savings, adds to the immediate capital outlay, further straining working capital resources in the short term. This will also lead to higher Inventory days as against cost of goods sold and is expecting them to be increase to 25 days in Fiscal 2025 and to 32 days in Fiscal 2026.</p>
Trade Receivable Days	<p>The company is in the business where receivables hold an important part of the working capital. The projects are milestone based, and payments are recovered based upon completion of such milestones as per project timeline. In past years, our Company has focused on expanding its client base, targeting high-value clients who often require extended payment cycles. These clients, while financially secure, tend to have more rigid internal payment processes, resulting in longer receivable periods. In fiscal 2024, Trade Receivable were at a level of 179 days. During the current fiscal i.e., F.Y. 2024-25, the company has diversified its client base where more favourable credit terms are available, apart from that company is having an order book largely from PSUs in which the company is expecting to release its receivable approximately to 70 days in Fiscal 2025 and 75 in Fiscal 2026. This trend is influenced by the standard industry practice wherein approximately 85% to 90% of the project value is received within 80 days, while the remaining 5% to 10% is retained for a defect liability period as per contract terms.</p>
Trade Payables	<p>The company was having a credit period availed from its suppliers ranging 106-140 days in previous years. To meet its additional demand from its customers, the company has made a revision in payment policy whereby it is paying its suppliers well in advance to source the raw materials at better rates and same will be supported by timely payments received from customers as the Trade receivable days have also decreased. Apart from the above our company has implemented a strategy of bulk procurement of raw material and consumable to timely deliver the large projects which also enable us to get us better discounts from our suppliers, this will lead to improved cost of material purchased and consequent increase in overall profitability of Company which has been factored in overall profitability projected for the Company. In addition of the above, as per the recent amendments in income tax act 1961, our company cannot hold payment for more than 45 days of its creditors registered under MSME's. so that by considering all these factors as described above our company is expecting its creditor holding level to be at approximately to 30 days in Fiscal 2025 and 38 days in Fiscal 2026.</p>
Short term loans and Advances	<p>Short Term loans and Advances majorly include advances to suppliers & salary advances given to the employees. These were Rs 70.69 lakhs at the Fiscal Ended on 2024 at a level of 9 days Approx. keeping the order book in view and market scenario, the short term loans and advances are expected be at approximately same level 10 days which means they are expected to increase to Rs 246.58 Lakhs in Fiscal 2025 and Rs.328.77 Lakhs in Fiscal 2026 in tandem with Revenue. To meet the additional sales demand and fulfil its order book, the company will need to make an advance payment to its suppliers. Paying the suppliers well in advance helps the company in receiving trade discount from its suppliers This would ultimately help the company to enhance its bottom-line.</p>
Other current assets	<p>Other Current Assets basically include the Tender Deposits, statutory receivables, taxes paid and prepaid expenses Which are maintained at a level of 54 days to Rs. 436.61 Lakhs in Fiscal 2024. the tender deposits, statutory receivables & taxes paid are directly correlated with the operations of the company. since in the Fiscal 2025 & Fiscal 2026, we are expecting robust increase in our operations so our GST Receivable and Advance Taxes paid will also get increased in proportion to increased inventories and increased revenue from operations respectively. Since all the other current assets are directly corelated with operational performance of the company, so that our</p>

	company is expecting the other current assets to be at approximately same level of 54 days in Fiscal 2025 and 60 days in Fiscal 2026 too.
Cash & Cash Equivalents	<p>Our business involves executing orders on-site, with multiple sites running concurrently. As we plan for future growth, the number of active sites is expected to increase, which will require higher levels of imprest cash at each site. This imprest cash is necessary to cover immediate expenses related to day-to-day operations, such as labour costs, material purchases, and transportation, among other site-specific needs. With the anticipated expansion of both our tendering activities and the number of operational sites, the cash required for imprest purposes will rise proportionally.</p> <p>Our company operates in a sector where the majority of orders are secured through a tendering process. During the tender bidding, we are required to provide various financial guarantees such as tender fees, Earnest Money Deposits (EMD), and short-term bank guarantees until the tender is either opened or awarded. Given our projected revenue growth, with a significant focus on expanding our tender bidding activities, we anticipate maintaining higher cash and cash equivalent reserve. This will support the financial needs for tendering activities, including the upfront costs for EMD deposits and other related expenses.</p> <p>Thus, increase in cash reserves to Rs. 149.78 Lakhs in Fiscal 2025 and Rs. 568.42 in Fiscal 2026 will ensure smooth financial operations across all sites and maintain adequate liquidity to fulfil both tender-related and site operational requirements.</p>
Other current Liabilities	Other Current liabilities majorly include expenses payable and statutory dues payable. the major portion in expenses payable is of manpower cost i.e., salary payable. We need to hire more workforce to timely deliver all the projects which will increase our monthly salary cost as well. Apart from that statutory dues payable includes mainly GST Payable which will also get increased in proportion to revenue from operations. All these current liabilities are expected to increase marginally with increase in level of operations of the company. For FY 2025, the company expects to keep the other financial liabilities days at 10 Days level and after keeping the days at such level it could be seen that the amount of other financial current liabilities will stand at Rs. 320.55 Lakhs for Fiscal 2025. This is clearly due to the reason increase in Employee Benefit cost & statutory payables, which will be higher as company is expecting to increase their level of operations. In Fiscal 2026 company is expected to keep Salary Payable lower and will pay salary on timely basis and thus Other Current Liabilities are expected to decrease to 92.05 Lakhs in Fiscal 2026.
Short term Provisions	Short term provision majorly includes provision of income tax and gratuity. The major reason in increase is mainly expected on account higher Provision for Income Tax & Gratuity provision which may also increase in correlation of new hiring by the company.

ANNEXURE TO THE STATEMENT OF SPECIAL TAX BENEFITS

The information provided below sets out the special tax benefits available to the Company and the Equity Shareholders under the Income Tax Act, 1961 presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in Equity Shares particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail.

A. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE COMPANY:

Under the Income Tax Act, 1961 (“the Act”)

Special tax benefits available to the Company

- The Company is not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

B. SPECIAL DIRECT AND INDIRECT TAX BENEFITS TO THE SHAREHOLDERS:

- The Shareholders of the Company are not entitled to any special tax benefits under the Income Tax Act, 1961 and GST Act.

NOTES:

1. The above Annexure of special tax benefits sets out the provisions of Tax Laws in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of shares.
2. The above Annexure covers only the special tax benefits under the Act, read with the relevant rules, circulars and notifications and does not cover any benefit under any other law in force in India. This Annexure also does not discuss any tax consequences, in the country outside India, of an investment in the shares of an Indian company.
3. The above Annexure of special tax benefits is as per the current direct tax laws relevant for the assessment year 2024-25. Several of these benefits are dependent on the Company or its shareholders fulfilling the conditions prescribed under the relevant provisions of the Tax Laws.
4. In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the relevant Double Taxation Avoidance Agreement, if any, entered into between India and the country in which the non-resident has fiscal domicile.
5. A new Section 115BAA has been inserted by the Taxation Laws (Amendment) Act, 2019 (‘the Amendment Act, 2019’) with effect from Financial Year 2019-20 granting an option to domestic companies to compute corporate tax at a reduced rate of 25.168% (22% plus surcharge of 10% and cess of 4%), provided such companies do not avail specified exemptions/ incentives. The option under section 115BAA of the Act once exercised cannot be subsequently withdrawn for any future financial year. The CBDT has further issued Circular 29/2019 dated October 02, 2019 clarifying that since the MAT provisions under Section 115JB itself would not apply where a domestic company exercises option of lower tax rate under Section 115BAA, MAT credit would not be available.

Lower corporate tax rate under Section 115BAA of the Act and Minimum Alternate Tax (‘MAT’) credit under section 115JAA of the Act which are in general available and hence may not be treated as special tax benefits.

The Company has evaluated and decided to exercise the option permitted under Section 115BAA of the Act for the purpose of computing its income-tax liability for the Financial Year 2023-24 and onwards.

6. This Annexure is intended only to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of tax consequences, each investor is advised to consult his or her tax advisor with respect to specific tax consequences of his/her investment in the shares of the Company.

GLOBAL ECONOMIC OVERVIEW

Global activity and world trade firmed up at the turn of the year, with trade spurred by strong exports from Asia, particularly in the technology sector. Relative to the April 2024 WEO, first quarter growth surprised on the upside in many countries, although downside surprises in Japan and the United States were notable. In the United States, after a sustained period of strong outperformance, a sharper-than-expected slowdown in growth reflected moderating consumption and a negative contribution from net trade. In Japan, the negative growth surprise stemmed from temporary supply disruptions linked to the shutdown of a major automobile plant in the first quarter. In contrast, shoots of economic recovery materialized in Europe, led by an improvement in services activity. In China, resurgent domestic consumption propelled the positive upside in the first quarter, aided by what looked to be a temporary surge in exports belatedly reconnecting with last year's rise in global demand. These developments have narrowed the output divergences somewhat across economies, as cyclical factors wane and activity becomes better aligned with its potential.

Meanwhile, the momentum on global disinflation is slowing, signaling bumps along the path. This reflects different sectoral dynamics: the persistence of higher-than-average inflation in services prices, tempered to some extent by stronger disinflation in the prices of goods (Figure 1). Nominal wage growth remains brisk, above price inflation in some countries, partly reflecting the outcome of wage negotiations earlier this year and short-term inflation expectations that remain above target. The uptick in sequential inflation in the United States during the first quarter has delayed policy normalization. This has put other advanced economies, such as the euro area and Canada, where underlying inflation is cooling more in line with expectations, ahead of the United States in the easing cycle. At the same time, a number of central banks in emerging market economies remain cautious in regard to cutting rates owing to external risks triggered by changes in interest rate differentials and associated depreciation of those economies' currencies against the dollar.

Global financial conditions remain accommodative. Although longer-term yields have generally drifted upward, in tandem with the repricing of policy paths, buoyant corporate valuations have kept financial conditions accommodative, broadly at the level of the April WEO. The increase in yields is likely to put pressure on fiscal discipline, however, which in some countries is already strained by the inability to rein in spending or raise taxes.

A Waxing and Waning Outlook

IMF staff projections are based on upward revisions to commodity prices, including a rise in nonfuel prices by 5 percent in 2024. Energy commodity prices are expected to fall by about 4.6 percent in 2024, less than projected in the April WEO, reflecting elevated oil prices from deep cuts by OPEC+ (the Organization of the Petroleum Exporting Countries, including Russia and other non-OPEC oil exporters) and reduced, but still present, price pressure from the Middle East conflict. Monetary policy rates of major central banks are still expected to decline in the second half of 2024, with divergence in the pace of normalization reflecting varied inflation circumstances.

Growth is expected to remain stable. At 3.2 percent in 2024 and 3.3 percent in 2025, the forecast for global economic growth is broadly unchanged from that in April (Table 1). Under the hood, however, offsetting growth revisions have shifted the composition.

Among advanced economies, growth is expected to converge over the coming quarters (Figure 2). In the United States, projected growth is revised downward to 2.6 percent in 2024 (0.1 percentage point lower than projected in April), reflecting the slower-than-expected start to the year. Growth is expected to slow to 1.9 percent in 2025 as the labor market cools and consumption moderates, with fiscal policy starting to tighten gradually. By the end of 2025, growth is projected to taper to potential, closing the positive output gap. In the euro area, activity appears to have bottomed out. In line with the April 2024 projection, a modest pickup of 0.9 percent is expected for 2024 (an upward revision of 0.1 percentage point), driven by stronger momentum in services and higher-than-expected net exports in the first half of the year; growth is projected to rise to 1.5 percent in 2025. This is underpinned by stronger consumption on the back of rising real wages, as well as higher investment from easing financing conditions amid gradual monetary policy loosening this year. Continued weaknesses in manufacturing suggest a more sluggish recovery in countries such as Germany.

In Japan, the strong shunto wage settlement is expected to support a turnaround in private consumption starting in the second half. But the expectation for 2024 growth is revised downward by 0.2 percentage point, with the downward adjustment largely reflecting temporary supply disruptions and weak private investment in the first quarter. The forecast for growth in emerging market and developing economies is revised upward; the projected increase is powered by stronger activity in Asia, particularly China and India. For China, the growth forecast is revised upward to 5 percent in 2024, primarily on account of a rebound in private consumption and strong exports in the first quarter. In 2025, GDP is projected to slow to 4.5 percent, and to continue to decelerate over the medium term to 3.3 percent by 2029, because of headwinds from aging and slowing productivity growth. The forecast for growth in India has also been revised upward, to 7.0 percent, this year, with the change reflecting carryover from upward revisions to growth in 2023 and improved prospects for private consumption, particularly in rural areas.

With regard to Latin America and the Caribbean, growth has been revised downward for 2024 in Brazil, reflecting the near-term impact of flooding, and in Mexico, due to moderation in demand. However, growth has been revised upwards in 2025 for Brazil to reflect reconstruction following the floods and supportive structural factors (for example, acceleration in hydrocarbon production). For the Middle East and Central Asia, oil production and regional conflicts continue to weigh on prospects. The growth forecast for 2024 in Saudi Arabia has been revised downward by 0.9 percentage point; the adjustment reflects mainly the extension of oil production cuts. Projected growth in Sudan is revised

markedly downward, as persisting conflict takes a larger toll on the economy. The forecast for growth in sub-Saharan Africa is revised downward, mainly as a result of a 0.2 percentage point downward revision to the growth outlook in Nigeria amid weaker than expected activity in the first quarter of this year.

Trade makes a recovery. World trade growth is expected to recover to about 3¼ percent annually in 2024–25 (from quasi stagnation in 2023) and align with global GDP growth again. The uptick in the first quarter of this year is expected to moderate as manufacturing remains subdued. Although crossborder trade restrictions have surged, harming trade between geopolitically distant blocs, the global trade-to-GDP ratio is expected to remain stable in the projection.

Global inflation will continue to decline. In advanced economies, the revised forecast is for the pace of disinflation to slow in 2024 and 2025. That is because inflation in prices for services is now expected to be more persistent and commodity prices higher. However, the gradual cooling of labor markets, together with an expected decline in energy prices, should bring headline inflation back to target by the end of 2025. Inflation is expected to remain higher in emerging market and developing economies (and to drop more slowly) than in advanced economies. However, partly thanks to falling energy prices, inflation is already close to prepandemic levels for the median emerging market and developing economy.

Future-Proofing the Economy

As output gaps start to close and inflation recedes, policymakers face two tasks: persevering with restoring price stability and addressing the legacies of recent crises, including replenishing lost buffers and durably uplifting growth. In the near term, this will require careful calibration and sequencing of the policy mix. In countries where upside risks to inflation—including those arising through external channels—have materialized, central banks should refrain from easing too early and remain open to further tightening should it become necessary. Where inflation data encouragingly signal a durable return to price stability, monetary policy easing should proceed gradually, which would simultaneously provide room for the required fiscal consolidation to take place. Fiscal slippages over the past year in some countries could require a stance significantly tighter than envisaged. As the space for fiscal maneuver narrows, commitments to achieving fiscal consolidation targets should be earnestly adhered to, aided by sound fiscal frameworks and resource mobilization.

In emerging market and developing economies, recent policy divergences highlight the need to manage the risks of currency and capital flow volatility. Given that economic fundamentals remain the main factor in dollar appreciation, the appropriate response is to allow the exchange rate to adjust, while using monetary policy to keep inflation close to target. Foreign reserves should be used prudently and preserved to deal with potentially worse outflows in the future, in line with the IMF's Integrated Policy Framework. To the extent possible, macroprudential policies should mitigate vulnerabilities from large exposures to foreign-currency-denominated debt. Near-term challenges aside, policymakers must act now to revitalize declining medium-term growth prospects. Striking differences in productivity trends across countries since the pandemic suggest that not all factors are cyclical and that decisive policy action is needed to enhance business dynamism and reduce resource misallocation to arrest weaknesses. Further boosting labor supply, especially by better integrating women and immigrants—key segments contributing to economic resilience in advanced economies—will mitigate demographic pressures, adding to potential growth gains. While emigration of the young and educated population can take a toll on source countries, the costs can be mitigated. Policies that help leverage diaspora networks, maximize the benefits from remittances, and expand domestic labor market opportunities are possible avenues.

Finally, the misuse of inward and domestically oriented policies compromises the ability to tackle global challenges—such as climate change—in regard to which multilateral cooperation and trade are vital. These policies are also often inadequate to address domestic issues, as they increase fiscal pressures and risk further distortions such as resource misallocation. All countries should thus scale back on use of trade-distorting measures and strive instead to strengthen the multilateral trading system.

INDIAN ECONOMY OVERVIEW

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During

the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of

India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDIAN INFRASTRUCTURE INDUSTRY

Introduction

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress.

Infrastructure is a key enabler in helping India become a US \$26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Mr. Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors.

The government's focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway.

Infrastructure support to the nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

The "Smart Cities Mission" and "Housing for All" programmes have benefited from these initiatives. Saudi Arabia seeks to spend up to US\$ 100 billion in India in energy, petrochemicals, refinery, infrastructure, agriculture, minerals, and mining.

The infrastructure sector is a key driver of the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from the Government for initiating policies that would ensure the time-bound creation of world-class infrastructure in the country. The infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India's economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure, and construction development projects.

To meet India's aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as 'Make in India' and the production-linked incentives (PLI) scheme to augment the growth of the infrastructure sector. Historically, more than 80% of the country's infrastructure spending has gone toward funding for transportation, electricity, and water, and irrigation.

While these sectors still remain the key focus, the government has also started to focus on other sectors as India's environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

Market Size

In Interim Budget 2024-25, capital investment outlay for infrastructure has been increased by 11.1% to Rs. 11.11 lakh crore (US\$ 133.86 billion), which would be 3.4 % of GDP. As per the Interim Budget 2023-24, a capital outlay of Rs. 2.55 lakh crore (US\$ 30.72 billion) has been made for the Railways, an increase of 5.8% over the previous year.

Starting with 6,835 projects, the NIP project count now stands at 9,142 covering 34 sub-sectors, as per news reports. Under the initiative, 2476 projects are under the development phase with an estimated investment of US\$ 1.9 trillion. Nearly half of the under-development projects are in the transportation sector, and 3,906 are in the roads and bridges sub-sector.

During FY 2023-24, Total revenue of Indian Railways stands at US\$ 28.89 billion (Rs 2.40 Lakh Crore) as on 15th March. Last year on 15th March, total Revenue was US\$ 26.84 billion (Rs 2.23 Lakh Crore).

India's logistics market is estimated to be US\$ 317.26 billion in 2024 and is expected to reach US\$ 484.43 billion by 2029, growing at a CAGR of 8.8%.

India intends to raise its ranking in the Logistics Performance Index to 25 and bring down the logistics cost from 14% to 8% of GDP, leading to a reduction of approximately 40%, within the next five years.

In December 2022, AAI and other Airport Developers have targeted capital outlay of approximately Rs. 98,000 crore (US\$ 11.8 billion) in airport sector in the next five years for expansion and modification of existing terminals, new terminals and strengthening of runways, among other activities.

India currently has the fifth-largest metro network in the world and will soon overtake advanced economies such as Japan and South Korea to become the third-largest network. Metro rail network reached 810 kms and is operational in 20 cities.

In the last 10 years, 697 km have been added to Metro Rail Network across the country. In 2024, about 945 km of metro rail lines are operational in 21 cities and 919 km is under construction in 26 different cities

At almost 20 kms, Mumbai monorail is the third largest route in the world after China with 98 kms and Japan with 28 kms.

FDI in construction development (townships, housing, built-up infrastructure and construction development projects) and construction (infrastructure) activity sectors stood at US\$ 26.61 billion and US\$ 33.91 billion, respectively, between April 2000-March 2024.

Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over 2021-26 driven by spending on water supply, transport, and urban infrastructure. Investment in infrastructure contributed around 5% of the GDP in the tenth five-year plan as against 9% in the eleventh five-year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India's planning commission during the 12th five-year plan, with 40% of the funds coming from the private sector.

Government Initiatives

The Government of India has taken several initiatives to promote a healthy environment for the growth of manufacturing sector in the country. Some of the notable initiatives and developments are:

Under Interim Budget 2024-25:

- The Central government has increased its capital expenditure (capex) allocation to US\$ 133.9 billion (Rs. 11.11 trillion) for the fiscal year beginning April 1, 2024, with a focus on advancing India's infrastructure, as part of a strategic move to stimulate economic growth. An increase of 11.1% from the previous year, the FY25 interim budget allots US\$ 133.9 billion (Rs. 11.11 trillion) for capital expenditures, or 3.4% of GDP.
- With a 37% increase in the current fiscal year, capital expenditures (capex) are on the rise, which bolsters ongoing infrastructure development and fits with Vision 202
- 7 goals for India's economic growth to become a US\$ 5 trillion economy. In order to anticipate private sector investment and to address employment and consumption in rural India, the budget places a strong emphasis on the development of roads, shipping, and railways.
- India's ambitious plan calls for spending US\$ 1.723 trillion (approximately Rs. 143 trillion) on infrastructure between FY24 and FY30, with a particular emphasis on power, roads, and developing industries like renewable energy and electric vehicles.
- Prime Minister Mr. Narendra Modi emphasized that India is committed to attaining net-zero carbon emissions by 2070, and that the country's ambitious goal of 500 gigawatts (GW) of renewable capacity by 2030 should be met. In order to make this possible, he unveiled a plan to raise the proportion of gas in India's energy mix to 15% by 2030, which will involve spending roughly US\$ 67 billion over the course of the following five to six years.
- In Interim Budget 2024-25, capital investment outlay for infrastructure has been increased by 11.1% to Rs.11.11 lakh crore (US\$ 133.86 billion), which would be 3.4 % of GDP.
- The government has decided to allocate Rs. 2.76 lakh crore (US\$ 33.4 billion) towards the Ministry of Roads for 2024-25.

- The allocation for solar power grid reached Rs. 8,500 crores (US\$ 1.02 billion) from the previous allocation of Rs. 4,970 crores (US\$ 598.80 million).
- The Interim Budget 2024-25 allocated Rs. 1,11,876.6 crore (US\$ 13.5 billion) for the Department of Telecom.
- The government announced Rs. 77,523.58 crore (US\$ 9.3 billion) to the Ministry of Housing and Urban Affairs.
- Three significant economic railway corridor initiatives—energy, port connectivity, mineral and cement, and high traffic density—will be carried out by the railway industry. Additionally, in order to improve passenger safety, convenience, and comfort, forty thousand standard rail bogies will be converted to Vande Bharat standards.
- In the aviation sector, the number of airports has doubled to 149, and currently, 1.3 crore passengers are transported on 517 new routes. Indian airlines have taken the initiative to order more than a thousand new aircraft.
- As part of the PM Awas Yojana (Grameen), two crores more houses to be taken up in the next five years. Despite COVID challenges, the target of three crore houses under PM Awas Yojana (Grameen) will be achieved soon.

Road Ahead

With a 37% increase in the current fiscal year, capital expenditures (capex) are on the rise, which bolsters ongoing infrastructure development and fits with 2027 goals for India's economic growth to become a US\$ 5 trillion economy. In order to anticipate private sector investment and to address employment and consumption in rural India, the budget places a strong emphasis on the development of roads, shipping, and railways.

Global investment and partnerships in infrastructure, such as the India-Japan forum for development in the Northeast are also indicative of more investments. These initiatives come at a momentous juncture as the country aims for self-reliance in future-ready and sustainable critical infrastructure.

India, it is estimated, needs to invest US\$ 840 billion over the next 15 years into urban infrastructure to meet the needs of its fast-growing population. This investment will only be rational as well as sustainable, if we additionally focus on long-term maintenance and strength of our buildings, bridges, ports, and airports.

As a result of digitalisation and opportunities that tier II and III cities present for economic growth, the divide between metro and non-metros is blurring, moving to the new era of infrastructure growth. Commercial real estate properties have witnessed exponential growth in demand across Tier II & III cities as Information technology and Information technology enabled services and banking financial services and insurance focused organizations are increasingly decentralizing their operations to adapt to the new normal.

The residential sector has witnessed good sales, and launches have also shown signs of an uptick during 2022, total sales in the top-7 cities was projected to exceed 360,000 units in 2022.

Civil Aviation Ministry's "Vision 2040" report states that there will be 190-200 functioning airports in India by 2040. Delhi and Mumbai will have three international airports each, while top 31 Indian cities will have two operational airports each.

220 destinations (airports/heliports/water aerodromes) under UDAN are targeted to be completed by 2026 with 1000 routes to provide air connectivity to unconnected destinations in India.

India's Infrastructure forms an integral part of the country's economic ecosystem. There has been a significant shift in the industry that is leading to the development of world-class facilities across the country in the areas of roads, waterways, railways, airports, and ports, among others. The country-wide smart cities programmes have proven to be industry game-changers. Given its critical role in the growth of the nation, the infrastructure sector has experienced a tremendous boom because of India's necessity and desire for rapid development. The expansion has been aided by urbanisation and an increase in foreign investment in the sector.

The infrastructure sector has become the biggest focus area for the Government of India. India's GDP is expected to grow by 8% over the next three fiscal years, one of the quickest rates among major, developing economies, according to S&P Global Ratings. India and Japan have joined hands for infrastructure development in India's Northeast states and are also

setting up an India-Japan Coordination Forum for development of Northeast to undertake strategic infrastructure projects for the region.

India being a developing nation is set to take full advantage of the opportunity for the expansion of the infrastructure sector, and it is reasonable to conclude that India's infrastructure has a bright future ahead of it.

INDIAN OIL & GAS INDUSTRY

Introduction

The oil and gas sector is among the eight core industries in India and plays a major role in influencing the decision-making for all the other important sections of the economy.

India's economic growth is closely related to its energy demand, therefore, the need for oil and gas is projected to increase, thereby making the sector quite conducive for investment. India retained its spot as the third-largest consumer of oil in the world as of 2023.

The Government has adopted several policies to fulfil the increasing demand. It has allowed 100% foreign direct investment (FDI) in many segments of the sector, including natural gas, petroleum products and refineries, among others. The FDI limit for public sector refining projects has been raised to 49% without any disinvestment or dilution of domestic equity in existing PSUs. Today, it attracts both domestic and foreign investment, as attested by the presence of companies such as Reliance Industries Ltd (RIL) and Cairn India. The industry is expected to attract US\$ 25 billion investment in exploration and production. India is already a refining hub with 23 refineries, and expansion is planned for tapping foreign investment in export-oriented infrastructure, including product pipelines and export terminals.

India's crude oil production stood at 4.89 MMT during April-May 2024.

Market Size

According to the IEA (India Energy Outlook 2021), primary energy demand is expected to nearly double to 1,123 million tonnes of oil equivalent, as India's gross domestic product (GDP) is expected to increase to US\$ 8.6 trillion by 2040.

Indian refining capacity has increased from 215.1 million Metric Tons Per Annum (MMTPA) to 256.8 MMTPA in last 10 years. And it is projected to increase to 309.5 MMTPA by the year 2028.

India is expected to be one of the largest contributors to non-OECD petroleum consumption growth globally. The consumption of petroleum products has increased from 158.4 million metric tons (MMT) in the fiscal year 2013-14 to 234.3 MMT in the fiscal year 2023-24.

High-Speed Diesel was the most consumed oil product in India and accounted for 38.6% of petroleum product consumption in FY23.

India's consumption of petroleum products stood at almost 4.44 million barrels per day (BPD) in FY23, up from 4.05 million BPD in FY22. India's crude oil production stood at 2.69 MBPD during April-October 2023.

India's LNG import stood at 30,917 million metric tonnes (MMSCM) between April 2023 – March 2024.

According to the International Energy Agency (IEA), consumption of natural gas in India is expected to grow by 25 BCM, registering an average annual growth of 9% until 2024.

Road Ahead

Rapid economic growth is leading to greater outputs, which in turn is increasing the demand of oil for production and transportation. Crude oil consumption is expected to grow at a CAGR of 4.59% to 500 million tonnes by FY40 from 223.0 million tonnes in FY23. In terms of barrels, India's oil consumption is forecast to rise from 4.05 MBPD in FY22 to 7.2 MBPD in 2030 and 9.2 MBPD in 2050. Diesel demand in India is expected to double to 163 MT by 2029-30, with diesel and petrol covering 58% of India's oil demand by 2045. Demand is not likely to simmer down anytime soon, given strong economic growth and rising urbanisation.

Natural Gas consumption is forecast to increase at a CAGR of 12.2% to 550 MCMPD by 2030 from 174 MCMPD in 2021. Indian refiners would add 56 million tonnes per annum (MTPA) by 2028 to increase domestic capacity to 310 MTPA. India is planning to double its oil refining capacity to 450-500 million tonnes by 2030. Energy demand of India is anticipated to grow faster than energy demand of all major economies globally on the back of continuous robust economic growth. Moreover, the country's share in global primary energy consumption is projected to increase to two-fold by 2035.

Our competition is based on numerous factors, more importantly, the type of project, total contract value, technical capability, complexity, location of the project and risks involved. While service quality, technical ability, performance record, experience, health and safety records and the availability of skilled personnel are key factors in client decisions among competitors. Goods and Service Tax Act, 2017

The Central Goods and Services Tax Act, 2017 is an Act to make a provision for levy and collection of tax on intra-State supply of goods or services or both by the Central Government and for matters connected therewith or incidental thereto. In line with CGST Act, each state Government has enacted State Goods and Service Tax Act for respective states. Goods and Services Tax (GST) is a comprehensive indirect tax on manufacture, sale and consumption of goods and services throughout India to replace taxes levied by the Central and State Governments. This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services or both as part of their normal commercial activity. The mechanism provides for two level taxation of interstate and intra state transactions. When the supply of goods or services happens within a state called as intra-state transactions, then both the CGST and SGST will be collected. Whereas if the supply of goods or services happens between the states called as interstate transactions and IGST will be collected. Exports are considered as zero-rated supply and imports are levied the same taxes as domestic goods and services adhering to the destination principle in addition to the Customs Duty which has not been subsumed in the GST.

Petroleum and Natural Gas Regulatory Board (the “PNGRB”) Regulations

i. PNGRB (Authorizing Entities to lay, build, operate or expand city or local natural gas distribution networks) Regulations, 2008 (the “CGD Authorization Regulations”)

The CGD Authorization Regulations authorize, regulate and lay down the criteria and procedure for entities to lay, build, operate or expand a City Gas Distribution (“CGD”) network. The CGD Authorization Regulations pave the way for development of CGD network and provides for selection of an entity through an open bidding process. Regulation 5 of the CGD Authorization Regulations specifies the minimum eligibility criteria for an entity to participate in the bidding process and regulation 14, 15 and 16 specify post authorization monitoring of activities, service obligations and the consequences of default and termination of authorization procedure. Regulation 5(8) provide for a period of ninety days for submission of application cum bid for grant of authorization for laying, building, operating and expanding the CGD network.

As per regulation 10(3) of the CGD Authorization Regulations, the grant of authorization to an entity cannot be renounced by way of sale, assignment, transfer or surrender to any person or entity till five years from the date of issue. On failure to abide by the terms and conditions specified in these regulations and/ or on failure to take remedial actions to correct the same, the performance bond may be encashed or the authorization of the entity may be terminated as per the procedure prescribed in regulation 16. Civil penalty under the PNGRB Act may also be applied.

The PNGRB (Authorizing Entities to Lay, Build, Operate or Expand City or Local Natural Gas Distribution Networks) Amendment Regulations, 2015, amended the CGD Authorization Regulations. Such amendments covered situations in case of a tie in the highest composite score between entities bidding for grant of authorization to lay, build, operate or expand city or local gas distribution network. In case of a tie between entities, such entities shall be asked to submit an additional bid bond and the entity submitting the bid bond of a higher amount shall be granted the said authorization. By way of this amendment, the PNGRB has also allowed an existing entity to induct a new partner in laying, building, operating or expanding city or local natural gas distribution network, till such time the existing entity continues to be a lead partner. In relation to selection criteria of an entity bidding for the authorization, the amendment lays down that an entity submitting the bid should not have been imposed any penalty under section 28 or punished under chapter IX of the PNGRB Act, during the period of preceding one year from the last date of submission of the bid. Further, the minimum time period before which an entity can renunciate its rights in favor of a new entity has been increased from three years to five years. The amendment in respect of an additional bid bond in case of a tie between the entities was applicable from the 4th City Gas Distribution Bidding Round to the 8th City Gas Distribution Bidding Round.

The PNGRB (Authorizing Entities to Lay, Build, Operate or Expand City or Local Natural Gas Distribution Networks) Amendment Regulations, 2016, amended the provisions of the CGD Authorization relating to definitions of “compression charge of CNG” and “network tariff”. The amendment also amended provisions in relation to criteria for bidding by entities and fixing of natural gas pipeline tariff etc. The amendment has allowed the PNGRB to determine the transportation tariff as per the PNGRB Act.

The PNGRB Exclusivity Regulations stipulate the terms under which the PNGRB can grant exclusivity rights over CGD networks to entities selected through a bid process or through other provision of the CGD Authorization Regulations and relevant section of PNGRB Act (authorized entity). The PNGRB is empowered to grant an exclusive right to lay, build or expand CGD networks (infrastructure exclusivity). Infrastructure exclusivity is granted for a term lasting the economic life of the project which is normally expected to be twenty five years. The PNGRB can also grant an exclusive right to supply gas through the CGD network i.e., exclusivity from the purview of common carrier or contract carrier (marketing exclusivity) to an entity proposing to lay, build or expand a CGD network. Marketing exclusivity can only be granted for

a limited period of time i.e., for a maximum period of five/eight years after which the authorized entity is required to allow other entities to supply gas through the CGD network on a non-discriminatory basis. Exclusivity has been offered to entities in order to incentivize investment in developing CGD networks and to facilitate their development in a planned and integrated manner. Entities selected to exclusively service a geographical area are required to furnish a specific performance bond to the PNGRB. Further, an authorized entity must comply with the service obligations set out in the regulations during and after the exclusivity period such as inter alia providing domestic PNG connections as per the bid and laying the CGD network throughout the authorized area.

iii. PNGRB (Guiding Principles for Declaring City or Local Natural Gas Distribution Network) Regulation, 2020 (the “PNGRB Guiding Principles Regulations”)

These PNGRB Guiding Principles Regulations have been issued by the PNGRB for the purpose of protecting the interests of consumers by fostering fair trade and competition amongst the entities, promoting competition among entities, avoiding infructuous investment and for maintaining or increasing supplies or for securing equitable distribution or ensuring adequate availability of natural gas to consumers. These regulations shall apply to an authorized entity after expiry of marketing exclusivity period of an authorized area.

iv. PNGRB (Technical Standards and Specifications including Safety Standards for City or Local Natural Gas Distribution Networks) Regulations, 2008 (the “Technical Standards Regulations”)

The Technical Standards Regulations address the design, materials, fabrication, installation, inspection and testing, commissioning, operation, maintenance, modifications and abandonment of CGD network. Standards for city or local natural gas distribution networks have been specified to ensure uniformity in the application of design principles and to guide selection and application of materials and components. These standards are monitored by the PNGRB to ensure compliance. In the event of failure to meet the standards laid down under the Technical Standards Regulations, the authorization of the entity may be suspended or terminated as per the procedure laid down thereunder. The PNGRB (Technical Standards and Specifications including Safety Standards for City or Local Natural Gas Distribution Networks) Amendment Regulations, 2016 have amended the provisions of Technical Standards Regulations relating to technical standards and specifications including safety standards for city or local natural gas distribution networks as specified in schedule-I which cover material and equipment (Schedule-1A), piping system components and fabrication (Schedule-1C) and design, installation and testing (Schedule-1D).

The authorized entities are required to declare entry point, exit point, exit point capacity and publish an information memorandum for seeking capacity booking on its website, 90 days before the end of its exclusivity period. The Access Code Regulations also provide for payment of certain charges to authorized entities by the shippers for gaining access to its CGD Networks. The Access Code Regulations prevent abuse of monopoly in the distribution system and promote the development of a competitive market by establishing uniform principles.

vii. PNGRB (Integrity Management System for City or Local Natural Gas Distribution Networks) Regulations, 2013 (the “Integrity Management Systems Regulations”)

The Integrity Management Systems Regulations outline the basic features and requirements for developing and implementing an effective and efficient integrity management plan for CGD networks through evaluating the risks associated with it and allocating resources effectively for prevention, detection and mitigation activities and improving the safety of CGD networks so as to protect personnel, property, public and environment and by streamlining operations. They provide a system for ensuring compliance with their provisions by conducting the following audits during operation phase:

- a) Internal audit as per the checklist for CGD Networks provided by PNGRB to be carried out by the management of the operator every year; and
- b) External audit by a third party, approved by the PNGRB, as per the methodology which is specified by the PNGRB every three years.

The Integrity Management System Regulations provide that in the event of any deviation or short fall in the implementation of the system the entity may be liable to face the penal consequences as per the relevant provisions of the PNGRB Act and Integrity Management System Regulations.

The capacity of a CGD network shall be determined by entities on the first working day of October every year or whenever there is a change in quantity of natural gas plus or minus 10% of previous declared capacity due to any of the following:

- a) change in quality of gas;
- b) modification, upgradation, addition or deletion of entry or exit points; and
- c) addition or deletion of loop lines, compressor etc.

Entities have to submit a report to the PNGRB once the determination of capacity is made. The PNGRB after analyzing the report submitted by an entity can either accept or reject the declared capacity. Once accepted, the entity shall publish the accepted CGD network capacity on its website in accordance with the Access Code Regulations.

ix. PNGRB (Codes of Practices for Emergency Response and Disaster Management Plan (ERDMP)) Regulations, 2010 (the “ERDMP Regulations”)

The ERDMP Regulations cover identification of emergencies, the mitigation measures to reduce and eliminate the risk or disaster, the preparedness required to develop plans for actions when disaster or emergencies occur. Schedule VII of the ERDMP Regulations lays down the emergency response and disaster management plan required to be implemented with respect to pipelines carrying petroleum products. The ERDMP Regulations also provide the responses that mobilize the necessary emergency services including responders like fire service, police service, medical service and the post disaster recovery with aim to restore the affected area to its original conditions. Emergencies under the ERDMP Regulations can be categorized into three broad levels on the basis of seriousness and response requirements. The ERDMP Regulations provide that records all incidents covered under Level-I should be maintained by the entity for inspection whenever called for inspection and Level-II and Level-III shall be reported to the PNGRB in the format specified within 48 hours after occurrence of the incidents or any other reason triggering major incident. The Pipeline Policy was notified on December 20, 2006. The Pipeline Policy provides that it may be read in conjunction with the provisions of the PNGRB Act and the rules and regulations framed thereunder. The objective of the Pipeline Policy is to facilitate open access for all players to the pipeline network on a non-discriminatory basis and promote competition among entities thereby avoiding any abuse of the dominant position by any entity. The Pipeline Policy applies to non-dedicated pipelines and not to dedicated pipelines. The latter have been defined as pipelines laid to supply gas to specific consumers originating from regulated pipelines provided the same are for their own use and not for resale. No non-dedicated gas pipeline or city or local gas distribution network may be laid, built, operated or expanded without authorization by the PNG Regulatory Board. If a company's pipelines come within the definition of dedicated pipelines, it is required to furnish certain details to the PNG Regulatory Board every six months. In case any such pipeline ceases to be a dedicated pipeline in future, the same may be brought to the notice of the PNG Regulatory Board and will require authorization to be granted by the PNG Regulatory Board under the provisions of the PNGRB Act. National Electricity Plan, 2023

The Central Electricity Authority (CEA) has released the National Electricity Plan (NEP) (Volume-I Generation) covering the period from 2022 to 2032. As outlined in the NEP document, the anticipated all India peak electricity demand and electrical energy requirement are projected to be 277.2 GW and 1907.8 billion units (BU) for the year 2026-27, and 366.4 GW and 2473.8 BU for the year 2031-32, based on the 20th Electric Power Survey (EPS) Demand projections. These projections encompass the impact of factors such as the increased adoption of Electric Vehicles, installation of solar rooftops, production of Green hydrogen, and the Saubhagya scheme. The National Electricity Plan for 2023 outlines measures to address energy requirements, including targeted utilization of clean energy resources.

Electricity (Promoting renewable Energy through Green Energy Open Access) Rules, 2022

The Electricity (Promoting Renewable Energy through Green Energy Open Access) Rules, 2022, introduced in India, mark a significant stride in promoting renewable energy adoption. These rules focus on facilitating green energy open access, ensuring access to affordable, reliable, sustainable and green energy for all. The framework aims to enhance the accessibility and utilization of clean energy, contributing to sustainability goals.

Renewable Purchase Obligations

The Electricity Act encourages the advancement of renewable energy sources by mandating the respective electricity regulatory commission to ensure the connection to the grid and the sale of electricity generated from renewable sources. Additionally, it obliges the relevant electricity regulatory commission to define a percentage of the total electricity consumption within a distribution licensee's area for the purchase of electricity from renewable sources, known as renewable purchase obligations (RPOs). In line with this requirement, most electricity regulatory commissions have outlined solar and non-solar RPOs in their respective states. According to RPO regulations, obligated entities (such as distribution licensees, captive power plants, and open access consumers) must fulfil their RPOs by procuring renewable energy. This can be achieved through power purchase agreements (PPAs) with renewable energy producers or by acquiring renewable energy certificates. In accordance with the order dated June 14, 2018 (no. 23/03/2016-R&R) from the Ministry of Power, Government of India (MoP), the MoP has communicated the consistent, long-term trajectory for renewable purchase obligations concerning both solar and non-solar categories. This trajectory is applicable uniformly to all states/Union Territories for duration of three years, spanning Fiscal Years 2020 to 2022. Furthermore, as per the order issued on January 15, 2021 (no. 23/12/2016-R&R) by the Ministry of Power, Government of India (MoP), the MoP has officially announced the exemption of inter-state transmission charges and losses for the transmission of electricity generated from solar and wind energy sources. Moreover, in accordance with the order issued on June 21, 2021 (no. 23/12/2016-R&R Part-(1) [239444]), in conjunction with the order dated January 15, 2021 (no. 23/12/2016-R&R) from the Ministry of Power, Government of India (MoP), the MoP has officially announced the exemption of inter-state transmission charges and losses for the transmission of electricity generated from solar and wind energy sources.

Central Electricity Authority (Measures Relating to Safety & Electric Supply) Regulations, 2023: The regulations were notified on June 08, 2023 thus repealing the regulations of 2010 and are applicable to electrical 145 | Page installation including electrical plant and electric line, and the person engaged in the generation or transmission or distribution or trading or supply or use of electricity. It states that no electrical installation work, including additions, alterations, repairs and adjustments to existing installations, except such replacement of lamps, fans, fuses, switches, domestic appliances of voltage not exceeding 250V and fittings as in no way alters its capacity or character, shall be carried out upon the premises of or on behalf of any consumer, supplier, owner or occupier for the purpose of supply except by an electrical

contractor licensed in this behalf by the State Government and on its behalf under the direct supervision of a person holding a certificate of competency and by a person holding a permit issued or recognized by the State.

ENVIRONMENT LAWS:

National Environmental Policy, 2006

The Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace but builds on the earlier policies. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of National Environmental Policy:—

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Inter-generational Equity
- Integration of Environmental Concerns in Economic and Social Development
- Efficiency in Environmental Resource Use
- Environmental Governance
- Enhancement of resources for Environmental Conservation

Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. Detailed information about each of these estimates and judgements is included in relevant notes together with information about the basis of calculation for each affected line item in the restated financial statements.

(iv) Property, Plant & Equipment:

Property, Plant & Equipment are carried at cost of acquisition and other applicable costs less accumulated depreciation and accumulated impairment loss, if any. The cost of fixed assets includes cost of acquisition plus, any freight, taxes, duties and other incidental expenses that are directly attributable to bring the assets to their working conditions for their intended use. Borrowing costs directly attributable to the qualifying assets are capitalized as part of the cost. The costs of internally generated assets comprise direct costs attributed to the generation of the assets.

Capital work in progress, if any comprises of the cost of fixed assets that are not yet ready for their intended use at the balance sheet date. Assets held for disposal, if any are stated at the lower of net book value and the estimated net realizable value.

When parts of the items of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment. Subsequent expenditure relating to the property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the company and the cost of the item can be measured reliably.

Gain / loss arising from de-recognition / sale / disposal of fixed assets are measured as the difference between the net disposal / sale proceeds and the carrying amount of the assets and are recognized in the statement of profit or loss when the asset is derecognized / disposed off.

Advances paid towards the acquisition of fixed assets, if any outstanding as of balance sheet date is disclosed under long term loans and advances.

No assets have been revalued during the year.

(v) **Intangible Assets:**

Intangible assets are stated at the consideration paid for acquisition less accumulated amortization and accumulated impairment losses, if any.

(vi) **Borrowing Costs:**

Loan processing charges and interest expenses paid to Bank for CC facilities and Term Loans have been charged to revenue account since the same are not attributable to the acquisition of qualifying assets as per the requirements of AS 16.

Borrowing cost primarily includes interest and amortisation of ancillary costs incurred in connection with the arrangement of borrowings.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the respective asset.

(vii) **Depreciation / Amortization:**

Depreciation on tangible fixed assets is calculated on the Straight-Line Method (SLM) based on the useful lives and residual values estimated by the management in accordance with Schedule II to the Companies Act, 2013. The identified components are depreciated separately over their useful lives; the remaining components are depreciated over the life of the principal asset.

Intangible assets, if any are amortized on basis of the economic benefits consumed by the company over the projected useful life and if the pattern of economic benefits cannot be identified reliably then the straight line method is used.

No assets have been revalued during the year.

The company has used the following useful lives to provide depreciation on its tangible assets and intangible assets.

Type of assets	Useful lives (in years)
Computers	03
Furniture and fixtures	10
Motor vehicles and Heavy Vehicles	08
Vehicles (2 wheelers)	10
Office Equipments	05
Plant and Machinery	15

(viii) **Impairment of Tangible and Intangible Assets:**

As per the estimates made by the management and as per the various assessments made by the management, there were no indicators whether internal or external (as provided in para 8 of AS 28) which has led to the impairment loss to any assets. Since there are no such indicators which suggest that the net value of the assets would fall significantly by passage of time and normal use, the company has not provided for any impairment loss for any assets during the current financial period. The company has chosen the "value in use" technique and as per the measurement of future cash flow, the management is of the opinion that the future cash flow and the terminal value of the assets would not be significantly less than the carrying value and hence no impairment for any assets has been provided for in the restated financial statements.

No reversal of impairment loss has been recognized in the Profit & loss Account.

Since the company has not carried out the activities in segments, the impairment loss or reversal of the impairment loss has not been provided for the segments.

In the opinion of the Board of Directors and to the best of their knowledge and belief the aggregate value of the current assets, loans and advances on realization in the ordinary course of business, will not be less than the amount at which they are stated in the Balance Sheet.

(ix) **Investments:**

Investments which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as long-term investments.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. If an investment is acquired, or partly acquired, by the issue of shares or other securities, the acquisition cost is the fair value of the securities issued.

Current investments are carried in the Restated Financial Statements at lower of cost and fair value determined in respect of each category of the investments. Long-term investments are carried at cost. However, provision for diminution in value, if any is made to recognize a decline other than temporary in the value of the investments.

On disposal of an investment, if any, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

(x) **Government grants and subsidies:**

Grants and subsidies from the government are recognised when there is reasonable assurance that:

- The Company will comply with the conditions attached to them, and
- The grant / subsidy will be received.

When the grant or subsidy relates to revenue, it is recognised as income on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs, which they are intended to compensate. Where

the grant relates to an asset, it is recognised as deferred income and released to income in equal amounts over the expected useful life of the related asset.

(xi) **Inventories:**

Inventories are stated at the lower of cost and net realisable value by following First In First Out ('FIFO') method. Cost of Inventories comprises all cost of purchase and other cost incurred in bringing inventories to their present location and condition. Cost in case of work in progress is determined on the basis of the actual expenditure attributable to the said work till the end of the reporting period.

Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

(xii) **Revenue recognition:**

Revenue comprises sale of services from pipeline fittings on work contract basis, erection, installation and commissioning services and interest. Revenue is recognised to the extent it is probable that the economic benefits will flow to the Company and that the revenue can be reliably measured. The Company collects Goods and Services Tax (GST) as applicable on behalf of the government and therefore, this is not economic benefits flowing to the Company hence, this is excluded from revenue.

Revenue from sales of Services:

Revenue from sale of services from pipeline fittings on work contract basis, erection, installation and commissioning services are recognised in the statement of profit and loss based on the invoice/ upon completion of work and in respect of work-in-progress at the end of the year, the same has been recognised on proportion of service completed.

Interest Income:

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.

(xiii) **GST :**

GST credit available on purchase of materials, purchase of capital goods and input services is not charged to cost of material, capital goods and services. GST Credit availed is accounted by way of adjustment against GST payable on rendering of services.

(xiv) **Retirement and other Employee benefits:**

Short term Employee benefits:

Short term benefits including salaries, social security contributions, short term compensated absences, if any (such as paid annual leave) where the absences are expected to occur within twelve months after the end of the period in which the employees render the related service, profit sharing and bonus payable, if any within twelve months after the end of the period in which the employees render the related services and non-monetary benefits (such medical care) for current employees are estimated and measured on an undiscounted basis.

During the year under consideration, the company has paid only salary to its employee and no other short term benefits are paid to any employee.

Long term employee benefits:

Defined Contribution Plan:

All eligible employees of the company are entitled to receive benefits under the provident fund, a defined contribution plan in which both the employee and the company contribute monthly at a stipulated percentage of the covered employee's salary. Contributions are made to Employees Provident Fund Organization in respect of Provident Fund, Pension Fund and Employees Deposit Linked Insurance Scheme, as applicable at the prescribed rates and are charged to Statement of Profit and Loss at actuals. The company has no liability for future provident fund benefits other than its annual contribution.

Defined Benefit Plan:

The Company operates a defined benefit gratuity plan in India, which requires contributions to be made to a separately administered fund. However, the company has not made any such contributions during the year. The cost of providing benefits under the defined benefit plan is based on an independent actuarial valuation carried out using the projected unit credit method.

Actuarial gain / loss is directly credited / debited to the Profit and loss account.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset.

(xv) **Foreign Exchange Transactions:**

The Company has not entered into any Foreign Exchange Transactions during the year under consideration.

The company has not entered into any forward exchange contracts during the year.

(xvi) **Taxation:**

Tax expense comprises current and deferred tax. Current income-tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India and tax laws prevailing in the respective tax jurisdictions where the Company operates. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit and loss. The amount of current tax actually determined at the time of filing of IT return for the Assessment Year determined the final self-assessment tax liability and accordingly the company has reversed the excess provision of current tax charged to statement of profit and loss in earlier period or made additional provision for current tax not charged to statement of profit & loss, in current reporting period as the case may be.

Deferred income taxes reflect the impact of timing differences between taxable income and accounting income originating during the current year and reversal of timing differences for the earlier years. Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted at the reporting date. Deferred income tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit and loss.

Deferred tax liabilities are recognised for all taxable timing differences. Deferred tax assets are recognised for deductible timing differences only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. In situations where the Company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognised only if there is virtual certainty supported by convincing evidence that they can be realised against future taxable profits.

At each reporting date, the Company re-assesses unrecognised deferred tax assets. It recognises unrecognised deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realised.

The carrying amount of deferred tax assets are reviewed at each reporting date. The Company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realised. Any such write down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set-off current tax assets against current tax liabilities and the deferred tax assets and deferred taxes relate to the same taxable entity and the same taxation authority.

Separate and detailed calculation of deferred tax is appended in these notes.

(xvii) Provisions and contingent liabilities. Contingent assets:

A provision is recognised when the Company has a present obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation and in respect of which a reliable estimate can be made of the amount of obligation. Provisions are not discounted to their present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These estimates are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Provisions of various expenses are recognized in the restated financial statements since there exists present obligations as a result of event and the expenses are accrued and incurred during the year.

The opening balance of provisions is used during the year against the payments during the year. The closing balances of provisions are the expenses accrued during the year and provided.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably.

The Company does not recognise a contingent liability but discloses its existence in the rested financial statements unless the possibility of an outflow is remote.

A contingent asset is not recognized in the restated financial statements and hence not disclosed.

(xviii) Earnings / (loss) per share:

Basic earnings / (loss) per share are calculated by dividing the net profit / (loss) for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period are adjusted for any bonus shares issued during the year and also after the balance sheet date but before the date the restated financial statements are approved by the board of directors for the purpose of calculating diluted earnings / (loss) per share. The net profit / (loss) for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

The number of equity shares and potentially dilutive equity shares are adjusted for bonus and right issue as appropriate. The dilutive potential equity shares are adjusted for the proceeds receivable, had the shares been issued at fair value. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date.

(xix) Cash Flow Statement:

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the company are segregated.

(xx) Cash and Cash Equivalents :

Cash and cash equivalents for the purpose of these restated financial statements comprise cash at bank and in hand, cheques on hand and short-term investments with an original maturity of three months or less.

(xxi) **Operating leases :**

As a Lessee:

Finance leases, which effectively transfers to the Entity substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the inception of the lease term at the lower of the fair value of the leased property and present value of minimum lease payments. Lease payments are apportioned between the finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognized as finance costs in the Profit and Loss Account. Lease management fees, legal charges and other initial direct costs of lease are capitalized.

A leased asset is depreciated on a straight-line basis over the useful life of the asset assessed by the management. However, if there is no reasonable certainty that the Entity will obtain the ownership by the end of the lease term, the capitalized asset is depreciated on a straight-line basis over the shorter of the estimated useful life of the asset.

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the Profit and Loss Account on a straight-line basis over the lease term.

As a Lessor:

Leases in which the Entity transfers substantially all the risks and benefits of ownership of the asset are classified as finance leases. Assets given under finance lease are recognized as a receivable at an amount equal to the net investment in the lease. After initial recognition, the Entity apportions lease rentals between the principal repayment and interest income so as to achieve a constant periodic rate of return on the net investment outstanding in respect of the finance lease. The interest income is recognized in the Profit and Loss Account. Initial direct costs such as legal costs, brokerage costs, etc. are recognized immediately in the Profit and Loss Account.

Leases in which the Entity does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Assets subject to operating leases are included in property, plant and equipment assets. Lease income on an operating lease is recognized in the Profit and Loss Account on a straight-line basis over the lease term. Costs, including depreciation, are recognized as an expense in the Profit and Loss Account. Initial direct costs such as legal costs, brokerage costs, etc. are recognized immediately in the Profit and Loss Account.

The dispute raised by the second party herein is that the connected workers have been engaged by the first party employer herein on contract basis, through its agents / contractors i.e. first party no. 4 to 8 at the time of filing of the dispute, and have been working with the employer since many years on its different operations and that their services has remained continued despite change in contract. Complaint (C.G.I.T.A) No. 01/2024; Complaint under Section 33A of the Industrial Disputes Act, 1947 filed and pending before the Hon'ble Presiding Officer, Central Government Industrial Tribunal -cum Labour Court at Ahmedabad**

As claimed, Complainant herein is a registered trade union under the Trade Union's Act, 1926 and had raised an industrial dispute before the Hon'ble Industrial Tribunal vide reference no. 44/2022 for regularization of concern workmen working with the Opponent no.1 establishment through opponent no. 4 to 9 (hereinafter collectively referred to as the contractors).

The Opponent has further claimed that when the dispute vide reference no. 44/2022 (hereinafter referred to as the Original Dispute) has been raised by the Complainant herein and that the statement of claim and interim relief (stay) application has been filed before the Hon'ble Tribunal, the opponents are under legal obligation to maintain status-quo regarding service conditions of concern and connected workmen of the original dispute.
